

MOTION

18B

Medical Marijuana dispensaries are currently under operation in the City of Los Angeles, and these dispensaries are monitored by City Departments and the Los Angeles Police Department. Still, there is currently no citywide coordinated effort for interested parties to sit together on a regular basis with Dispensary leadership to make certain protocols and safety are maximally effective.

By fostering a citywide program that coordinates a regular meeting time (ie: monthly or bimonthly), we help increase the safety and security of the collectives and their staffs, patients, and neighborhoods;

I THEREFORE MOVE that the Los Angeles Police Department, the Department of Building and Safety, and any other relevant Departments report back on an action plan by which at least one member of the Medical Marijuana dispensary management must attend a coordinated, regularly held meeting with the Los Angeles Police Department and other relevant City staff, and how this program will be organized and implemented citywide.
