TRANSPORTATION

MOTION

The importance of bike riding in the City of Los Angeles is a critical element in reducing traffic congestion and improving the air quality of Southern California. The City should work with community groups to develop programs that respect bicyclists and work to protect their means of travel.

I THEREFORE MOVE that the City Council direct the Department of Transportation, with the assistance of the CAO, report on the availability of federal transportation dollars to support bicycle safety programs and conduct outreach regarding bike awareness in Los Angeles.
