\*DECEASED

December 2, 2010

Commissioner Paula Daniels  
City of Los Angeles Board of Public Works  
Room 361-P, Mailstop 464  
200 North Spring Street  
Los Angeles, CA 90012-4801

Dear Commissioner Daniels:

The Southern California Contractors Association supports your leadership in the effort to provide the City of Los Angeles with a forward-looking, effective and attainable plan for improving water quality through low-impact development.

We have appreciated the willingness of you and your staff to both listen and incorporate some of our ideas, field experience and suggestions into your final product.

While we are aware that the state and other governmental bodies are working on similar projects, we believe it important that the City take a position as a leader in this area. Our experience in the field of environmental regulation tells us that all rules like this are a work in progress, subject to amendment as new knowledge and practice dictate.

The City's leadership and practical understanding will be invaluable to these other bodies as they come to the table on this issue. We hope, as an industry, to see a future set of rules that are uniform throughout our area so that they are both effective and attainable, as we believe this ordinance to be.

Sincerely,

William E. Davis  
Executive Vice President
