

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by

Comments: Students shouldn't be treated like criminals because
we aren't, we are just trying to better ~~our~~ ourselves.

Sincerely,

Signature

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by

Comments: Thank you for addressing this pertinent structural issue within
education, which only caused more issues with families and education instead of
addressing them.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Dear City Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically issue that causes students harms such as:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Dear City Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically issue that causes students harms such as:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

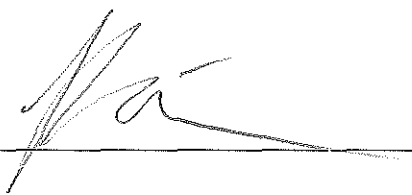

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by, instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

Comments:

Truancy tickets should stop you never know why a kid is late & what problems they have in the morning.

Sincerely,

Diamond Jones

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: We must end all criminalization + other
punitive efforts that harm our young people + impact their education.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by, instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Dear Councilmember Cardenas and Parks,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: Fining students for attending school should not
come to mind.

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

Comments: it is simply not right

I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: Ever since I almost got a ticket for being late for school I
decided from that day to just stay home to avoid a truancy ticket.

Dear Mayor Villaraigosa,

I'm asking you as my representative on the Board of LA Metro to ensure the agency upholds civil rights law and protect the rights of 500,000 Black, Latino, and low income bus riders like myself.

As the recent federal civil rights review showed, Metro cut bus service over the the last 3 years even though its own reports found those cuts would lead to racial discrimination. When Metro raised our fares, they didn't even bother to see whether the increase was racially discriminatory. In short, Metro knowingly violated our civil rights. It forced people like me to suffer longer waits and long bus trips even as we stretch to pay higher fares in the middle of an economic recession. **I'm asking you to use your position inside the MTA Board to:**

- Rescind the bus service cuts and bring the million hours back
- Reverse the upcoming 2012 fare increase
- Return the \$42 monthly bus pass

Comments: Please make public transit affordable, efficient and
available to all citizens in LA.

Thank you,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: Stop truency tickets!

Dear Board member Steve Zimmer,

I write in support of Councilman Cardenas' motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing attendance. Your leadership is critical—students need Los Angeles Unified School District to pass a resolution that supports the amendments to the daytime curfew and restores discipline as a school base issue. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles Unified School District to author a motion in support of amending the Daytime Curfew.

Comments: Pass the Ammendment, we need
more councilors { teachers Not cops.

Padres Pastorales

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

- Imposing financial burden
- Forcing students to miss school
- Increasing student involvement likely to be pushed out of school

The common sense amendment would connect students to school, even if they are late, instead of punishing them for being late.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: A broken community needs not more reason to reinforce barriers between members, LAPD and LAUSD. It is an injustice to serve working families with fees they cannot afford. Having to choose between paying bills and paying tickets is a huge injustice to families.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by, instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: this law hurts families because some may not have a job and they don't have the additional time and money to pay for these tickets
And I'm sure students want to go to school to help their family. These tickets just make them want to stay away from school and their education.

Sincerely,

Signature

I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: I could barely afford this. I would reach out to family. What
if I don't have anyone to help...

Sincerely,

Kelci Hahn

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Dear Councilmembers,

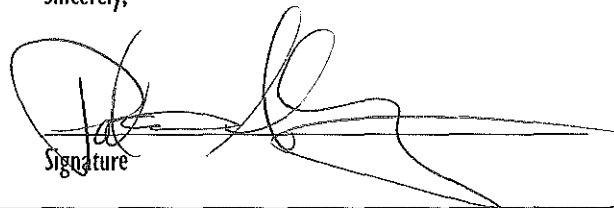

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Organization/School: Community Rights Campaign / RFK UCLA

Dear President Monica Garcia,

I appreciate your leadership in working with the Community Rights Campaign and the Dignity in School Campaign in securing the Los Angeles School Police Directive to ease the citing of students under the daytime curfew law (LAMC 45.04). It is critical to keep this momentum—students need you to author a resolution in support of the amendments to the daytime curfew which will restore discipline as a school base issue. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles Unified School District to write a resolution in support of amending the Daytime Curfew.

- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Dear Councilmembers,

I write in strong support of the motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Dear Councilmembers,

I write in strong support of the motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

Dear President Monica Garcia,

I appreciate your leadership in working with the Community Rights Campaign and the Dignity in School Campaign in securing the Los Angeles School Police Directive to ease the citing of students under the daytime curfew law (LAMC 45.04). It is critical to keep this momentum—students need you to author a resolution in support of the amendments to the daytime curfew which will restore discipline as a school base issue. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles Unified School District to write a resolution in support of amending the Daytime Curfew.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: Maybe instead of completely removing 1-day time
curfew tickets, instead these students should get a warning.

Sincerely,

Jonathan Olivares

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

Comments: I think its dumb that tardy tickets
are even made up.

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: Takes time away from education because my
friend had to spend 3 school days in court.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

Comments:

Its Not Right to fine people for being late to school, they are still GOING to school

Antioch University, Los Angeles

Dear Councilmembers,

I write in strong support of the motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by, instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

I strongly urge the Los Angeles City Council to pass this motion.

Comments:

In general, giving officers discretion over a population they regard as hostile is a recipe for civil unrest.

Comments: By enforcing a law that was meant to keep kids in

school by not researching the reasons why they are late ignores
a larger problem. Please
repeat this law so we can work
together to solve the bigger
problems.

I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

Dear Board member Steve Zimmer,

I write in support of Councilman Cardenas' motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing attendance. Your leadership is critical—students need Los Angeles Unified School District to pass a resolution that supports the amendments to the daytime curfew and restores discipline as a school base issue. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles Unified School District to author a resolution in support of amending the Daytime Curfew.

Dear Board member Steve Zimmer,

I write in support of Councilman Cardenas' motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing attendance. Your leadership is critical—students need Los Angeles Unified School District to pass a resolution that supports the amendments to the daytime curfew and restores discipline as a school base issue. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles Unified School District to author a resolution in support of amending the Daytime Curfew.

Comments: Why students of color? When all races do it... Leave
race out of this

Sincerely,

I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by, instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

Dear Board member Steve Zimmer,

I write in support of Councilman Cardenas' motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing attendance. Your leadership is critical—students need Los Angeles Unified School District to pass a resolution that supports the amendments to the daytime curfew and restores discipline as a school base issue. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles Unified School District to author a resolution in support of amending the Daytime Curfew.

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

Comments: If not, at least lower the fines for families with
low income

Sincerely,

 Alyzza

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: This is not right. I do not like this. STOP DOING THIS!

\$250 is too much for a \$ ticket.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

Comments: These tickets are unfair & need to stop!!

Sincerely,

- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students, who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Dear Councilmembers,

I write in strong support of the motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Dear Councilmembers,

I write in strong support of the motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by, instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: Thank you very much for considering amending this law. It is a shame that some kids
had to be put in this situation before we realized how it would affect them.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students, who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: I think that curfew tickets are racist
to minorities, especially for the crime, and just a bribe.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by, instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: It's unfair to ticket a child
when the are late to their education
although they're trying-
to get it.
Sincerely,

The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: truancy tickets are a bad idea because if a kid getting a ticket from going to school late or just taking a day off
for being sick is setting a type of mentality at school that will make them avoid school.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: I think the law should be amended because
people have their bad days and its not fair.

- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

Comments: A very bad way to keep students in school. Good job guys!

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: I believe that students should be given
an equal chance at a good education.

- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: This and other laws that criminalize youth need to
end because children are the future.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: finding other alternatives is more effective than just having
"daytime curfew" laws.

Comments: I think that truancy tickets are a very incorrect way of attacking
the problem. Many families are financially unstable & this only creates more of a burden &
more problems.

I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: I will be a voter next year, just saying.

- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: I believe that it is unfair for police men
to be ticketing students mainly in the East Los Angeles
Area.

Sincerely,

Dear Councilmembers,

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: No more tickets that are unnecessary!

Sincerely,

Signature

- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion.

Comments: I think this is really unfair because you guys make the law and we
have to obey it but we don't have a voice in changing the law.

Dear Councilmembers,

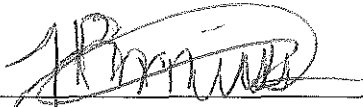

I write in strong support of your motion to amend the "daytime curfew" law (LAMC Section 45.04), which has proved to be detrimental to students and their families and a failure in increasing community safety. I would like to thank you for your leadership on addressing this critically important issue that causes students harms. The current daytime curfew law is ineffective, wasteful and unfairly targets all students and in particular students of color by:

- Imposing financial burdens on families with low-incomes and forcing them to pay the hefty fines of \$250 or more per ticket
- Forcing students to miss additional school, sometimes two or three days, to attend mandatory court hearings
- Increasing student involvement with the juvenile court when statistics has proven that students will then be four times as likely to be pushed out of school.

The common sense amendments in this critical motion will stop unnecessarily penalization of students who are trying to get to school, even if they are late, ensure that families do not suffer undue financial hardships, and help minimize court involvement by instead connecting students to resources to ensure academic success. I strongly urge the Los Angeles City Council to pass this motion."

Comments: I will be able to vote in 2 years.

Sincerely,
