Comments for Public Posting: I am opposed to any and all installation of 5G capable towers and/or AGFs without further studies of the effects of microwave bands including 3GHz to 30GHz proving their safety to the environment and the public. Be aware, by law, the city will be liable for damages without 3rd party liability insurance, AKA Pollution insurance. The contracts for these AGFs must include random intermittent RF testing and there must be fully and legally executed permits completed for each AGF install. Anything short of public hearings and further diligent research of this matter would be grossly negligent and unconstitutional. DO YOUR RESEARCH before moving forward with such a dangerous and unnecessary project. Thank you
