Re: Installation of above ground facility (AGF) in Residential Zoned Area of Westchester, Ca. 90045 located at West 78th St., 81' East of El Manor Street and West 78th St., 85' East of El Manor Street (City Ref.: # 2009006005)

Dear Mr. Ladou,

The Westchester Neighbors Association membership consists of the residents living within the 90045 zip code and is open to associate membership by our local businesses and works for the betterment of our quality of life.

There is significant objection to placement of these towers in our residential neighborhood instead of being placed in commercial areas. Our association opposes the T-Mobile's application for a variance to build a Power Meter Pedestal, 20.25" wide x 17.25" deep x 48" high and to install a 43 foot tall wood utility pole because it is located among homes.

Another cell tower pole extension proposal, ENV-2010-1919-CE, at 5580 W. Thornburn Ave. in our community is more appropriately placed. This letter includes a satellite map photo showing the location of this tower which serves as an example of more appropriate placement. It does not obstruct views nor irritate neighbors with the controversy addressing health or safety risks.

Feel free to contact us if you have any questions.

Sincerely,

Stuart H. Garrison, Chairperson

Westchester Neighbors Association

cc. Councilman Bill Rosendahl
