RE: CF [09-2645](#)

Dear Public Works Committee Members:

We call for the enactment of a comprehensive new ordinance uniformly regulating all wireless telecommunications facilities (WTF). We generally support the City Attorney's recommendations for changes in public right-of-way (PROW) regulations (including elimination of the utility pole exemption, expanding notification requirements and adding aesthetic considerations).

We also request enactment of additional important, reasonable provisions not specifically recommended by the City Attorney -- e.g., extending appeal rights to interested persons/Neighborhood Councils/City Councils/Homeowners Associations, establishing meaningful set-backs from dwellings/parks/schools, and requiring certification of compliance with FCC RF emissions standards. We also urge that a temporary moratorium be put in place in regard to PROW WTF while new regulations are being drafted.

Thank you.

R. Paul Sundmark
