

PROW CELL TOWERS/ SDSU BRAIN CANCER CLUSTER

Virginia Farver vrfarv@hotmail.com
10:35 AM (4 minutes ago)

To Whom it May Concern,

I would like to respond to the installations of PROW cell towers in L.A., and wanted to share my Story with you. I lost my Beautiful, YOUNG Son from Glioblastoma Multiforme Brain Cancer on October 11, 2008. Rich, had attended SDSU (San Diego State University) ,and was working and living in San Diego at the time of diagnosis. Diagnosis was March 14th, 2008 and Rich, lived just shy of 7 months. Dr. Verjesh Tantuwaya told the family that his cell phone was the culprit. Tumor location was in the right frontal lobe, and he was right handed - Ispwerlateral.

August 7, 2009 while at home in Colorado I found articles and a video about a, ' Brain Cancer Cluster on the SDSU campus.' I'll put the links below, and Rich is the graduate student these are referring too. I immediately started to contact the SDSU Administration and found this to be futile. I then drove out to San Diego, staying the whole month of October 2009. I met with Professors Nancy Speckmann (Rich, was her TA) and Farid Abdel-Nour off campus for meetings. Both Professors told me that my Son spent long hours in Nasatir Hall, ROOM 131 (where most of the brain cancer victims were located). I was told that my Son would meet with students in this room, study and grade papers, even on weekends.

After arriving back home the SDSU Administration had sent me an Epidemiological Report written by a Dr. Thomas Mack. 3rd paragraph of this report he mentions that he has, ' No known knowledge of chemical or radiation concerns and therefore are none.' I e-mailed Dr. Mack and he called me at home. I asked him about a specific Cell Tower that is directly outside of Nasatir Hall, and room 131. Dr. Mack denied this could be the cause and brushed this off rather quickly. I then told him of every ones concerns and he said," They should be concerned." This comment made me furious at first but over time, I have wondered if he was giving me a clue? Because of his report, the SDSU Administration will not conduct a toxicology study. These Professors have requested one and were denied. I have also requested one on several occassions, never receiving a response back. I contacted the Governors office and the area Representative Marti Emerald. Both referred me back to SDSU.

I decided to look into this cell tower on my own. It is a HPWREN or High Performance Wireless Research and Educational Network, a Backbone Node to the UCSD Supercomputer Center in San Diego. It is also GWEN or Ground Wave Emergency Network, with emissions known to hug the ground. Nasatir Hall, room 131 is the bottom floor of a 3 story building. These Supercomputers are all connected by backbone nodes by the Lambda Rail, Tera Grid - SMART GRID. These towers are capable of sending signals several thousands of miles to remote labratories across California, the nation and other Countries. These can also be used for Through Wall Surveillance and for Crowd Control on college campuses. There are, '2,' HPWREN cell towers on the SDSU campus. One is on top of the Communications Building on campus (which towers above Nasatir Hall) , and one on top of the KPBS News Station on campus. Both cell towers are considered being located at the highest points on campus.

HERE ARE THE KNOWN SDSU BRAIN CANCER VICTIMS:

RICH FARVER - diagnosed and died from GBM Brain Cancer, October 11, 2008/ Nasatir Hall, ROOM 131

LOU TERRELL - diagnosed with Primary Brain Lymphoma (Brain Cancer), 2008/ Nasatir Hall, room next to 131

CHARLES CUTTER - diagnosed and died from GBM Brain Cancer, April 19, 2008/ Nasatir Hall, ROOM 131

RICHARD FUNSTON- diagnosed and died from GBM Brain Cancer, 1993 with cell tower present and taken down in 1995 to once again be replaced/ Nasatir Hall, ROOM 131
DWIGHT ANDERSON - diagnosed and died from Different FORM of cancer, 2008/ Nasatir Hall, ROOM 131
Ms. LAUREL AMTOWER - diagnosed with GBM Brain Cancer, November 2009, died August 29, 2010/ Arts and Letters Building, right next to Nasatir Hall, (within yards)
MRS KATHY O'HARA - diagnosed with GBM Brain Cancer, May 2008/ KPBS News Station on campus (still alive, although not doing well)

After the death of Ms. Laurel Amtower on August 29, 2010 I contacted NBC Producer in San Diego, Paul Krueger. He was very interested in doing a story until I sent him this information. Silence! A reporter from the, ' San Diego Tribune,' called me at home and told me that this story would, " Never get out in San Diego." I asked him, " Why?" He replied, " Because of Money." This is nothing Short of a Cover-up!!! This is the SMART GRID with its engineers and scientists who are developing smart meters, drones, and whatever else they can dream up. This is the, ' Military (Intelligence) - Industrial Complex,' for which President Dwight Eisenhower warned the U.S. citizens of in his, ' 1961 Farewell Speech, and of its GRAVE Consequences.' I know of these consequences which have all but destroyed my life, and the lives of my family. This is the Federal Government disguised under the NSF or National Science Foundation.

This Story was Instrumental in the WHO or World Health Organizations classification for a Class 2B carcinogen concerning non-ionizing radiation. This classification was VERY close to being a class 2A carcinogen. It is not a matter of IF, but When this classification is changed. Wifi, Cell Phones, Cell Towers, Smart or AMI meters are all in this category. I've also been told by several of the Experts, (that I have been involved with), that with the deployments of Smart or AMI meters and with 4G in our atmosphere, we will ALL be living in the same amount of radiation during a given day as these SDSU Cancer Victims. End Stages for Non-Ionizing radiation. All cell phone manuals say to keep away from your heads and bodies! BlackBerry Torch: keep .98 inches away from your heads and bodies and for Pregnant Women and Teenagers to avoid putting these devices near their lower abdomins. Yet, NO warning labels!!! The, ' Interphone Study,' that was released had many flaws. Many of the participants in this study either become too ill to finish or died. A Heavy cell phone user was considered a 30 minute a day user. Rich's records were showing an average of between 2-3 hours per day. Many of these were by texting. Cordless phones were also not included. Cordless phones are just as dangerous as a cell phone!!

I was in San Diego fall 2011. I went to the campus on several occasions. The Communications cell tower (that towers above Nasatir Hall), is not only still there, but has since been added onto. Nasatir Hall, ROOM 131 is now boarded up. Why? They are hiding this!! There is a courtyard under the Communciations tower. I watched as kids sat and ate,

studied, read, talked with friends for hours at a time. The KPBS News Station cell tower is directly across the street from newly constructed Fraternity Row housing. The one directly across the street is adorned with metal balcony railings and metal windows. I once again, observed boys sitting on these balconies for hours at a time. I wanted to drop to my knees. How many of these kids will become ill in the near future? Maybe some already have? Some form of Cancer, No Doubt!! I also met a film crew on campus, and both towers measured within lethal levels of radiation.

Rich, suffered from a rash (across the bridge of his nose after purchasing 1st cell phone), Headaches, Nausea, Anxiety (was having panic attacks), Endrochrine Problems (excessive underarm sweating, which mysteriously disappeared after leaving SDSU), Extreme FATIGUE, Sinus Problems (Rich suffered from nose bleeds every morning), Sleep Disorders, among others. If only I had known!!! These are REAL symptoms and need to be taken seriously. Between my Son's cell phone useage and exposure from this Powerful cell tower, there was NO chance for survival.

I'm pleading with you to rethink installing PROW cell towers near any homes, schools, businesses, churches or where the public gathers. With the proliferation of cell towers across the U.S. the death toll will be devastating. Trust me, I do not want anyone else or their families to suffer such a fate. I not only fear for the lives of our kids, I fear for Humanity.

Sincerely, and Heart Broken,
Virginia Farver
