Dear L.A. Council Members,

This tells of the Class 2B carcinogen being very close to a class 2A carcinogen. 6th page, 1st paragraph.

Sincerely,
Virginia Farver

Subject: Prof. G. Kumar debating ICNIRP Chair & industry-funded "experts" in India Conference
To: michkhong@yahoo.com

Report: Workshop on "Testing and Compliance for EMF in the Mobile Industry" on Feb. 7, 2012 and International Health Conference on "Ensuring Public Health and Safety in the Mobile Industry" on Feb. 8, 2012
Organized by ASSOCHAM at New Delhi

Must read... <http://goo.gl/nT9vW>

And please share with others. (Permission granted by Professor Kumar)

Feb. 2012:

"Finally, when ICNIRP Chairman, Dr. Paolo Vecchia, said that ICNIRP guidelines of radiation density of 9.2 W/m² is valid for 1 day, 1 year and even 100 years of exposure; I asked him, "Shall we expose you to 9.2 W/m² continuously for one year?". There was total silence".....

"Dr. Vijayalaxmi, Professor at Department of Radiation Oncology, University of Texas Health Science Center [funded by Motorola and U.S Air force - Microwave News, July 31, 2006] mentioned that she is an independent researcher".....

Prof. Kenneth Foster....said that if parents have a concern let them not give mobile phones to their children.

Prof' Kumar's daughter replied that it means it is not safe for children, "which resulted in a stir in the audience."
