Comments to PLUM 1/26/2010 Agenda No. 5, CFI 09-3070

CPC 2009-2677-GPA-SPA-ZC-DA is a planning case for property without proper environmental documentation. The 2001 Environmental Impact Report for the Los Angeles Sports and Entertainment District LASED ENV-2000-3577-EIR does not apply to the current environmental impacts of the LASED.

There was no environmental documents circulated nor was there an opportunity for the public to comment. The document identified as an "Addendum" was not circulated through the State Clearinghouse.

The developers of the project seem to have changed from the original approval of all documents. Properties are added without mitigation.

This property is within a Methane Hazard Site (Buffer Zone).

The City of Los Angeles has failed in up keeping Infrastructure reports.

Please deny approval of this report.
