CASE NUMBER: **CHC-2010-534-HCM**
LENTO BRICK COURT
1288-1292 WEST SUNSET BOULEVARD

At the Cultural Heritage Commission meeting of May 20, 2010, the Commission moved to include the above property in the list of Historic-Cultural Monument, subject to adoption by the City Council.

As required under the provisions of Section 22.171.10 of the Los Angeles Administrative Code, the Commission has solicited opinions and information from the office of the Council District in which the site is located and from any Department or Bureau of the city whose operations may be affected by the designation of such site as a Historic-Cultural Monument. Such designation in and of itself has no fiscal impact. Future applications for permits may cause minimal administrative costs.

The City Council, according to the guidelines set forth in Section 22.171 of the Los Angeles Administrative Code, shall act on the proposed inclusion to the list within 90 days of the Council or Commission action, whichever first occurs. By resolution, the Council may extend the period for good cause for an additional 15 days.

The Cultural Heritage Commission would appreciate your inclusion of the subject modification to the list of Historic-Cultural Monuments upon adoption by the City Council.

The above Cultural Heritage Commission action was taken by the following vote:

Moved: Commissioner Kennard
Seconded: Commissioner Dake
Ayes: Commissioners Louie, Scott, and Barron

Vote: 5-0

LENTO BRICK COURT
1288-1292 WEST SUNSET BOULEVARD

As you will note from the attached copy of our communication to the Los Angeles City Council, the Cultural Heritage Commission has moved to include the above-referenced property in the list of Historic-Cultural monuments, subject to adoption by the City Council.

In due course, our transmittal will be given a council file number and will be referred to the Council's Planning and Land Use Management Committee for review and recommendation. If you are interested in attending the Council Committee meeting, you should call Patrice Lattimore at (213) 978-1074 for information as to the time and place of the Committee and City Council meetings regarding this matter. Please give Ms. Lattimore at least one week from the date of this letter to schedule this item on the Committee Agenda before you call her.

FINDINGS

The building "embodies the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period style or method of construction" as an example of courtyard housing architecture.

CRITERIA

The criterion is the Cultural Heritage Ordinance which defines a historical or cultural monument as any site (including significant trees or other plant life located thereon) building or structure of particular historic or cultural significance to the City of Los Angeles, such as historic structures or sites in which the broad cultural, economic, or social history of the nation, State or community is reflected or exemplified, or which are identified with historic personages or with important events in the main currents of national, State or local history or which embody the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period style or method of construction, or a notable work of a master builder, designer or architect whose individual genius influenced his age.

SUMMARY

Constructed in 1928 and located on Sunset Boulevard in the Echo Park area, this courtyard residential building demonstrates character-defining features of courtyard housing with some Renaissance Revival style features. Exhibiting a "U court" plan arranged on downward slope, the subject property consists of five buildings, two two-story and three one-story, with two identical elevations containing ground-level commercial storefronts fronting Sunset Blvd. The courtyard area consists of two rows of one-and two-story detached residential buildings, arranged around a stepped central courtyard and concrete stairwell. A single story centrally-placed residential building intersects the courtyard space at the summit of the subject property. All buildings have flat roofs with raised squared corners on the parapets topped with glazed white brick trim. The exteriors of all buildings on the subject property consist of exposed uniform brick. The residential entrances feature arched stonework with keystone designs and arched wood paneled doors. Additional glazed brick detailing on the commercial façades include banding and rectangular designs. The storefront on the western side of the front elevation has a black tile bulkhead and a recessed entry. The subject building's windows consist of glass and wood multi-pane casement and double hung windows. Decorative features include glazed brick lentils and sills on street-facing windows and red brick lentils and sills on all other windows. Additionally, windows on the main elevation have small steel basket-type balconies and window boxes.

The proposed Lento Brick Court historic monument was designed in 1928 by Conrad Martin Ellington and Frank B. Chambers of the firm Ellington and Chambers. The subject property was profiled in the book Courtyard Housing in Los Angeles (1992) by Stephanos Polyzoides, Roger Sherwood, and James Tice.

Alterations to the subject property include the addition of seismic reinforcement, security bars and awnings as well as replacement of windows sashes with aluminum. A transom-style window band above one of the storefronts has been covered by plywood.

The subject property appears to be a significant example of courtyard housing with Renaissance Revival features.

DISCUSSION

The Lento Brick Court property successfully meets one of the specified Historic-Cultural Monument criteria: "embodies the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period style or method of construction." As a distinctive multi-family residential complex designed as courtyard housing, the property qualifies for designation as a Historic-Cultural Monument based on this criterion.

The staff of the Office of Historic Resources (OHR) acknowledges some integrity issues with the subject building stemming primarily from alterations to its windows. The subject building also suffers from some deferred maintenance and lack of repairs. However, based on its intact character-defining features and as a rare example of brick courtyard housing, the subject building appears eligible for local designation.

BACKGROUND

At its meeting of April 1, 2010, the Cultural Heritage Commission voted to take the application under consideration. On May 6, 2010, the Cultural Heritage Commission toured the subject property.

CALIFORNIA ENVIRONMENTAL QUALITY ACT ("CEQA") REVIEW

State of California CEQA Guidelines, Article 19, Section 15308, Class 8 "*consists of actions taken by regulatory agencies, as authorized by state or local ordinance, to assure the maintenance, restoration, enhancement, or protection of the environment where the regulatory process involves procedures for protection of the environment.*"

State of California CEQA Guidelines Article 19, Section 15331, Class 31 "*consists of projects limited to maintenance, repair, stabilization, rehabilitation, restoration, preservation, conservation or reconstruction of historical resources in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic buildings.*"

The designation of the Lento Brick Court as a Historic-Cultural Monument in accordance with Chapter 9, Article 1, of The City of Los Angeles Administrative Code ("LAAC") will ensure that future construction activities involving the subject property are regulated in accordance with Section 22.171.14 of the LAAC. The purpose of the designation is to prevent significant impacts to a Historic-Cultural Monument through the application of the standards set forth in the LAAC. Without the regulation imposed by way of the pending designation, the historic significance and integrity of the subject property could be lost through incompatible alterations and new construction and the demolition of irreplaceable historic structures. The Secretary of the Interior's Standards of Rehabilitation are expressly incorporated into the LAAC and provide standards concerning the historically appropriate construction activities which will ensure the continued preservation of the subject property.

The use of Categorical Exemption Class 8 in connection with the proposed designation is consistent with the goals of maintaining, restoring, enhancing, and protecting the environment through the imposition of regulations designed to prevent the degradation of Historic-Cultural Monuments.

The use of Categorical Exemption Class 31 in connection with the proposed designation is consistent with the goals relating to the preservation, rehabilitation, restoration and reconstruction of Historic buildings in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving Rehabilitating, Restoring, and Reconstructing Historic Buildings.

SUMMARY

Constructed in 1928 and located on Sunset Boulevard in the Echo Park area, this courtyard residential building demonstrates character-defining features of courtyard housing with some Renaissance Revival style features. Exhibiting a "U court" plan arranged on downward slope, the subject property consists of five buildings, two two-story and three one-story, with two identical elevations containing ground-level commercial storefronts fronting Sunset Blvd. The courtyard area consists of two rows of one-and two-story detached residential buildings, arranged around a stepped central courtyard and concrete stairwell. A single story centrally-placed residential building intersects the courtyard space at the summit of the subject property. All buildings have flat roofs with raised squared corners on the parapets topped with glazed white brick trim. The exteriors of all buildings on the subject property consist of exposed uniform brick. The residential entrances feature arched stonework with keystone designs and arched wood paneled doors. Additional glazed brick detailing on the commercial façades include banding and rectangular designs. The storefront on the western side of the front elevation has a black tile bulkhead and a recessed entry. The subject building's windows consist of glass and wood multi-pane casement and double hung windows. Decorative features include glazed brick lentils and sills on street-facing windows and red brick lentils and sills on all other windows. Additionally, windows on the main elevation have small steel basket-type balconies and window boxes.

The proposed Lento Brick Court historic monument was designed in 1928 by Conrad Martin Ellington and Frank B. Chambers of the firm Ellington and Chambers. The subject property was profiled in the book Courtyard Housing in Los Angeles (1992) by Stephanos Polyzoides, Roger Sherwood, and James Tice.

Alterations to the subject property include the addition of seismic reinforcement, security bars and awnings as well as replacement of some windows sashes with aluminum. A transom-style window band above one of the storefronts has been covered by plywood.

The subject property may be significant as an example of courtyard housing with Renaissance Revival features as well as for its possible association with the development of Echo Park.

CRITERIA

The criterion is the Cultural Heritage Ordinance which defines a historical or cultural monument as any site (including significant trees or other plant life located thereon) building or structure of particular historic or cultural significance to the City of Los Angeles, such as historic structures or sites in which the broad cultural, economic, or social history of the nation, State or community is reflected or exemplified, or which are identified with historic personages or with important events in the main currents of national, State or local history or which embody the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period style or method of construction, or a notable work of a master builder, designer or architect whose individual genius influenced his age.

FINDINGS

Based on the facts set forth in the summary and application, the Commission determines that the application is complete and that the property may be significant enough to warrant further investigation as a potential Historic-Cultural Monument.

THE LENTO BRICK COURT WAS BUILT IN 1928
NAME OF PROPOSED MONUMENT YEAR BUILT
THE BUNGALOW COURT WAS IMPORTANT TO THE
NAME OF PROPOSED MONUMENT

19. DEVELOPMENT OF LOS ANGELES BECAUSE THE BUNGALOW COURT WAS UNIQUE TO SOUTHERN CALIFORNIA AS A WAY OF PROVIDING AFFORDABLE HOUSING TO MANY WHO FIRST ARRIVED IN THE EARLY DECADES OF THE 20TH CENTURY. THE EARLIEST EXAMPLES BEGAN TO APPEAR IN THE MID 1890S, WHEN BUILDERS FIRST BEGAN CONSTRUCTING THE GROUPINGS OF LIKE HOUSING. ONE EARLY EXAMPLE WAS NOTED IN 1895 BEING A GROUP OF 12 COLONIAL STYLE FLATS THAT WERE BUILT FOR J. B. BINFORD ON THE SOUTHEAST CORNER OF 11TH STREET AND GRAND AVENUE. WHEN THE PROPERTY WAS REBUILT AS COMMERCIAL DEVELOPMENT IN 1923, SEVERAL OF THE BUNGALOWS WERE RELOCATED AS FREE-STANDING RESIDENCES. ONE SURVIVOR, AT 626 LOOKOUT DRIVE, OVERLOOKING CHINATOWN, WAS DEMOLISHED IN OCTOBER OF 2008, FOLLOWING A MAJOR FIRE. BY THE YEARS LEADING TO WORLD WAR I, THESE EARLY COURTS HAD BECOME A COMMON PART OF THE SOUTHERN CALIFORNIA LANDSCAPE. THOUGH ORIGINALLY BUILT ON FLAT LAND, THEY WERE FOUND TO BE WELL ADAPTED AS HILLSIDE DEVELOPMENTS, MAKING USE OF LAND THAT WOULD HAVE BEEN MUCH MORE COSTLY TO DEVELOP IF MAJOR GRADING AND SHORING WAS DONE. THE EARLY COURTS ARE REFERRED TO AS A "U-PART" DESIGN BY STEFANOS POLYZOIDES AND HIS CO-AUTHORS IN THEIR BOOK "COURTYARD HOUSING IN LOS ANGELES: A TYPOLOGICAL ANALYSIS". A PHOTOGRAPH OF THE SUBJECT PROPERTY, TAKEN BY JULIUS SHULMAN, AS WELL AS A RENDERING OF THE LENTO BRICK COURT LAYOUT APPEAR ON PAGES 43 AND 41 OF THE BOOK. THE VAST MAJORITY OF THESE EARLY COURT STRUCTURES WERE BUILT IN EITHER THE CRAFTSMAN OR THE MISSION REVIVAL/SPANISH COLONIAL REVIVAL STYLES. LATER EXAMPLES INCLUDED STORYBOOK DESIGNS AS WELL AS THE MORE MODERN STYLES SUCH AS STREAMLINE MODERNE, HOLLYWOOD REGENCY AND THE MINIMALIST MODERNISM THAT REPRESENTED MUCH OF THE TRACT HOUSING THAT PROLIFERATED IMMEDIATELY BEFORE AND IN THE DECADE OR SO AFTER THE SECOND

CITY OF LOS ANGELES
SIGNIFICANCE WORK SHEET
CONTINUED

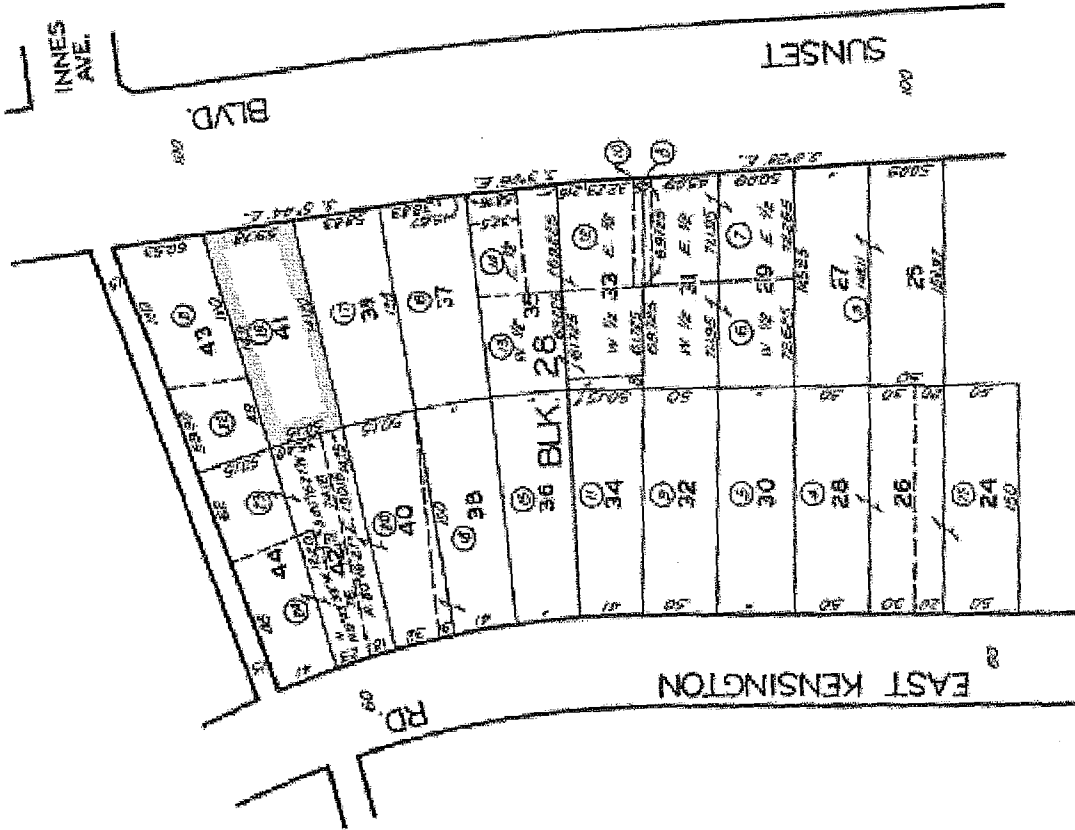

WORLD WAR. A GOOD EXAMPLE OF THE MISSION REVIVAL STYLE IS FOUND IN CHARLES CONRAD'S SUN RISE COURT IN HIGHLAND PARK (HCM 400). THESE SIMPLE COURTS GAVE TENANTS A FEELING OF HAVING THEIR OWN SEPARATE DWELLINGS AS OPPOSED TO THE COMMUNAL ASPECT OF AN APARTMENT. BY THE MID 1920S, THE DESIGN CONCEPT OF THESE COURTS USHERED IN THE COURTYARD APARTMENT. THE LENTO BUILDINGS EVOKE A SIMPLIFIED RENAISSANCE REVIVAL DESIGN WITH THE USE OF BRICK CONSTRUCTION. THE RARITY IS THAT THESE HILLSIDE STRUCTURES ARE BUILT OF MASONRY, RATHER THAN THE FRAME STRUCTURES THAT ARE NORMAL FOR THIS TYPE OF HOUSING. THE SYMMETRICAL DESIGN OF THE COMPLEX SUPPLIES A TEXTBOOK EXAMPLE OF HOW THE COURT FLOWS UP THE HILLSIDE, WITH THE STRUCTURES FLANKING A CENTRAL CONCRETE STAIRCASE. THE FRONT TWO STRUCTURES COME TO THE SIDEWALK WITH THE TRADITIONAL MIXED USE DESIGN OF RESIDENTIAL OVER COMMERCIAL WITH THE BUILDINGS IMMEDIATELY TO THEIR REAR BEING DUPLEXES WITH ONE UNIT STEPPED ABOVE THE OTHER, GIVING THEM THE APPEARANCE OF BEING FOUR BUILDINGS, RATHER THAN TWO. THE RECTANGULAR REAR STRUCTURE FLOWS ACROSS THE TOP OF THE STAIRS, GIVING THE COMPLEX A COURTYARD FEEL. EACH UNIT HAS AN UNOBSTRUCTED VIEW OF THE NEIGHBORHOOD. THE ARCHITECT, CONRAD ELLINGSON, BEING A NATIVE OF MINNESOTA, WAS FAMILIAR WITH THE MANY BRICK COMMERCIAL AND RESIDENTIAL BUILDINGS OF THE MIDWEST. IN DESIGNING THE LENTO COURT, HE APPLIED THIS MIDWESTERN DESIGN CONCEPT TO THE PURELY CALIFORNIA CONCEPT OF THE BUNGALOW COURT, WHICH CREATED THIS RARE GROUPING OF STRUCTURES. HIS PARTNER, FRANK C. CHAMBERS, WAS ABLE TO ENGINEER THE BUILDINGS TO MAKE THEM FIRM ON THEIR HILLSIDE SITE. A SECOND SET OF BRICK COURTS WERE LATER CONSTRUCTED TO ADJACENT TO THE EAST OF THE LENTO COMPLEX. THE EXCAVATION FOR THOSE BUILDINGS CAUSED LENTO TO BRING HIS ORIGINAL CONTRACTOR BACK TO REINFORCE THE UNDERPINNINGS OF THE EASTERN BUILDINGS TO THE DEPTH OF NEW EXCAVATION. THE ONLY OTHER MAJOR WORK WAS THE REINFORCEMENT UNDER DIVISION 88 FOR THE SEISMIC SAFETY. SOME OF THE WINDOWS HAVE ALSO BEEN REPLACED, INCLUDING THE FRONT CASEMENTS ON THE UPPER UNITS OF THE FRONT BUILDING WHICH ARE NOW SINGLE HUNG ALUMINUM. THE WINDOW CHANGES HAVE NOT COMPROMISED ANY OF THE OPENINGS AND ARE EASILY REVERSIBLE. THE BUILDINGS ALSO HAVE A STORYBOOK INFLUENCE WITH THE ELABORATE CONCRETE ARCHED PORTALS FOUND AROUND THE RESIDENTIAL DOORS, IN A NOD TO A STYLE THAT WAS SO INFLUENCED BY THE MOVIE INDUSTRY IN SOUTHERN CALIFORNIA. THESE COURT STRUCTURES BECAME THE FIRST HOME IN SOUTHERN CALIFORNIA FOR SO MANY WHO CAME FROM OTHER PARTS OF AMERICA AS WELL AS ABROAD. LENTO'S OWN ROOTS IN ITALY TELL THIS VERY STORY OF AN IMMIGRANT WHO MADE HIS LIFE IN LOS ANGELES AND WORKED HARD TO FIND A PART OF THE CALIFORNIA DREAM.

The U Parti

The U parti is the most common and typical idea for a courtyard housing scheme. Because of the great number of observed examples of this kind (fully 80 percent of all known courts in Los Angeles are of the U-parti kind), there appear interesting variations of the original idea.

The most telling aspect of this type is its transformation from a detached-unit, single-story building to an attached-unit, two-story, completed courtyard building. This transformation is instrumental in describing the development of the type from its primitive beginnings to its sophisticated and most mature manifestations.

Left
Variations of the Charnell-Legrand
court type as observed in the Echo
Park district of Los Angeles

Another source of formal diversity is topography. Because much of the growth of Los Angeles occurred near the hills surrounding downtown, courts had to adjust themselves to topographical constraints. The most typical uphill or downhill buildings provide for the parking of cars in enclosed garages on street level and then generate terraces, shared by at least two units, out of the hillside. This breaking up of the courtyard into many parts at different levels, usually connected but discontinuous, results in a strong articulation of the immediate relationship between the dwelling and the courtyard.

Other interesting side effects of the U downhill courts include the spectacular views they offer into the valleys surrounding them and the fine light they may receive (depending on their orientation), since their overall form permits penetration of the sun's rays.

Most U-parti examples, especially the ones constructed at the turn of the century as cheap housing for new immigrants, follow the unit type patterns of the previously discussed parties. The units are uniform, repetitive, and spatially very tight indeed. Later, though, especially in the late 1920s, there arose another type of court on the U parti which departed fundamentally from earlier examples. What characterized these second- and third-generation courts is variation in section, both at the level of the whole building and at the level of the dwellings themselves. The result is the development of new courtyard housing prototypes that offer a complex, occasionally picturesque massing with a variety and diversity of dwelling units, and even of uses, within them. In rare and very well developed cases, no two units within a court are the same.

Courts of this kind are surrounded on three sides by buildings and most typically are located with their open end facing the street. Often the front of the court at the street is completed with a thin wall screen connecting the two front bars of the U. The definition of the courtyard is powerful, and, if the width and the shape of the site allow, the courtyard can be given qualities and character as a substantial landscape element. There are three kinds of courtyards in this type: the ones that serve merely as passage; the ones that are more generous, but simply define the courtyard as the sum of the pieces belonging to individual units; and the ones that offer a developed and independently formed courtyard with no

Boulevard in Echo Park.

focus on any one unit. Within all three types, individual entrances into units are typically articulated, as are other important building elements. It is actually highly instructive that the celebration of the uniqueness of these building elements (stairs, doors, windows, and so on) comes about only when a stable and observable parti is established.

The dominant technology in the construction of these courts is wood frame; therefore, with the numbers of examples of this kind of parti available, the stylistic range we have observed is extraordinary. It would be fair to say that following on the example of single-family houses at this time, every single historical style is represented—both occidental and oriental, both vernacular and erudite, both ancient and modern. One is faced here, not with academic issues of revivalism of styles, but with full-fledged style wars.

One of the factors that causes special distortions in the U-parti courts is the car. It has been mentioned before that in cases of uphill courts, the car is often nestled underneath the first terrace. There exist many other ingenious ways of accommodating the car within this type. Vehicular access typically occurs on the edges of sites. Therefore, cars are often parked in separate structures on the sides or on the backs of buildings, or in uncommon but interesting cases they are accommodated within particular parts (especially in the back) of the bars that form the U-building. In rare and exceptional cases the car is placed underneath the courtyard. It is, of course, obvious that in many turn-of-the-century courts and those built before 1920, the car is not accommodated at all.

Increased density requirements forced the intensification of building within the court envelope. The massing transformation of courts within the U confines has already been discussed. Another kind of transformation that is equally interesting is the one that begins to distort the U parti into a higher-order type, typically the closed courtyard type. A number of observed examples illustrate this point. Especially in situations of generous courtyards, the bars of the U begin to turn the corner as if to suggest the ultimate act of enclosure.

Top
The street is often defined by the connection of the two wings of the typical U-dwelling with a corner wall.

Above and right
The courtyard in its simplest form is a passage. It is later transformed into a space dependant on the dwelling unit and finally becomes a stable, fully formed exterior public room.

Above
Aerial view of Arthur S. Zwerger's
El Cabello, 1928. This is a good
example of a deluxe completed
courtyard type.

The car, which is diversely accommodated, generates some of the most basic distortions of the completed-courtyard parti. Most commonly, parking is located underneath the buildings. Such an innovation for buildings constructed as early as 1925 was a major contribution to the world body of developing housing ideas. In a substantial number of other cases, the car is accommodated outside the domain of the central courtyard by major additions to the main building. Garages are used as means to create an independent car domain, to complete the space available in irregular sites, or to take advantage of alleys or special access opportunities in corner sites.

The imagery of these highly elaborated courtyard housing examples is decidedly Spanish Revival, but as the names of most buildings reveal, their source is rather decidedly urban Mediterranean vernacular. The unique aspect of this revivalism lies in the fact that the authors of the deluxe courts aimed to express in their buildings something beyond mere eagerness to reproduce details of southern European building prototypes. They actually attempted to create substantial urban fragments that would suggest in that climate and at that nostalgia-saturated time the possibility of being in the Mediterranean. It is for this reason that the interior elevations of many courts appear to be discontinuous and made up of clashing, disparate parts simulating the growth of an urban whole over time. The compulsive concern with urban fragments as opposed to single buildings led architects to a precise definition of the public urban elements (such as street plans, ground finishes, balustrades, and roofs) on whose definition the positive reading of overall environmental quality often rests and on which the eliciting of fantasy-related responses to places also depends.

Where courts of this kind are found close to each other in the city, they suggest an inward, closed world separated from the street. One begins to get a reading of a neutral exterior urban space, left empty for the benefit of vehicles and representing some kind of stiff, formal public behavior, while behind the walls of the courts lurk all the forbidden temptations to act privately and freely.

ANGELINO HEIGHTS HISTORIC PRESERVATION OVERLAY ZONE

Contributor - Altered Structure

Location: 1288 West Sunset Boulevard, Los Angeles, CA 90026

Historic Name: Apartment and Store for Geo & Charlotte Lento

Description: 2-story, Eclectic Revival; Utilitarian Court-style Stores & Residential

Alterations: Storefronts have been altered. Security gate over windows and doors.

HPOZ Criterion: AS1) Altered structure with minor alterations, but it is a contributor because it was built within the HPOZ's period of significance and the nature and extent of alterations are determined to be reversible by the Historic Resources Survey.

Significance: Evaluation Code: 5D1-AS1. Significant Features: Detailed brick work.

Building Info: Built in 1928 by A. S. O'Neal Co. Permit No. 26830, dated 9/26/1928. Originally owned by Geo & Charlotte Lento. Designed by Ellingson & Chambers. Estimated Cost of Construction: \$5,000.

Landscape Features: Raised yard with concrete steps. Streetlight. NC-Security iron gate and door.

Survey Date: 9/30/2004 12:26:52

BUNGALOW COURTS

Designed For California Living

By Dennis Sullivan

At the beginning of the Twentieth Century, Southern California was already a popular destination for tourists trying to escape harsh winters back home or sometimes seeking the light and air that could cure their illnesses. Cheap train fares driven by rail price wars drew visitors from large Eastern cities like Chicago as never before. Many stayed while others returned for annual winter retreats. At the same time, builders were busy constructing everything from apartments to beautiful hotels that would provide temporary housing for these visitors and new residents.

Around 1909, a new concept in temporary dwellings started an architectural style that continues to this day, the bungalow court. This style has its roots in either the Spanish patio villa or, as some have suggested, the summer cabin resort in the woods. Either way, the layout for bungalow courts gave builders a method to increase the number of homes per acre. With demand high for tourist and temporary housing, this community court concept was tremendously popular with builders and dwellers alike.

The concept was centered on two or three land parcels joined together so a group of cottages could be built around a central open space in which a walkway or driveway would be added. Early bungalow courts were built on lots of at least 100 feet wide with eight or more cottages. The open space typically was a garden area around 50 feet wide with a walkway and plantings for each cottage. After 1920 bungalow courts became narrower with widths typically of only 75 feet. Car parking on many courts was generally at the rear of the units. An enclosed court had a structure, often a larger unit, at the end of the open space that created the U shape.

The architectural style of these courts ranged from Spanish Colonial Revival to Swiss Chalet. They all shared the basic design of cottages arranged around a courtyard. Builders found that they could keep the California garden setting so popular with bungalow homebuilders while reducing land costs by using the court plan. Most significant bungalow courts were built from 1910 to 1933. The Depression stopped the steady growth of new bungalow courts across the country.

Like bungalow home design in general, the court bungalows shared the cost-cutting elements of no basements and no attics. However, they also shared the integration of garden and house. The gardens and courtyards helped, along with patios and porches, to bring the outdoors closer and to provide some seclusion in what was a cluster of homes.

The bungalow court cottage gave the occupant an affordable home that was much more than an apartment with the feel of a single family home. The fact that many courts still exist today is testimony to the quality of life they provide as well as a solid source of income for the owners.

Redondo Beach still has good examples of bungalow courts which have somehow survived through the growth of condominium and apartment complexes over the years. An excellent bungalow court is the H&M Courts at 207-211 South Broadway. Built in 1923 by Annie and Anthony Hock, it features Craftsman bungalow design elements such as fireplaces, built-ins and exposed beams.

A review of the Sanborn insurance maps from 1916 until 1946 indicated that the majority of bungalow courts in Redondo Beach were built on Catalina and Broadway Avenues. Some of the Catalina Avenue courts were on the west side of the street and were demolished with the city's urban renewal of the 1960s.

A walk down Broadway south of Diamond Street is a great way to enjoy the remaining bungalow courts. Some are small and very lush with gardens such as the units at 127-129 North Broadway. Others show the Bungalow warmth and charm with excellent Craftsman touches as seen in the 129-133 S. Broadway courts. Other courts are located at 511-513 S. Broadway and 117-121 Broadway. At 518 Catalina Avenue just north of Sapphire still stands a beautiful example of the community court concept. At the northeast corner of Broadway and Emerald is a Spanish style court of tightly grouped cottages.

The court design represents a successful attempt to bring gardens and homes together in a community setting of both private and public space. It is truly an idea that has allowed many Californians to enjoy the good life.

Building Permit History
1288-92 Sunset Boulevard
Echo Park

- September 26, 1928: Building Permit No. 26830 to construct a 2-story 5-room 21' X 38' 6" brick masonry apartment and store at 1288 and 1288½ Sunset Boulevard on Lot 41, Block 28, Angeleno Heights.
Owner: George & Charlotte Lento
Architect: Ellingson & Chambers
Contractor: A. S. O'Neal Co.
Cost: \$6,000.00
- September 26, 1928: Building Permit No. 26831 to construct a 1-story 8-room 21' X 52' brick masonry 2-unit apartment at 1292 1/8 and 1292¼ Sunset Boulevard on Lot 41, Block 28, Angeleno Heights.
Owner: George & Charlotte Lento
Architect: Ellingson & Chambers
Contractor: A. S. O'Neal Co.
Cost: \$4,500.00
- September 26, 1928: Building Permit No. 26832 to construct a 2-story 6-room 34' 6" X 46' 6" brick masonry 3-unit apartment at 1290½, 1290¾ and 1292 Sunset Boulevard on Lot 41, Block 28, Angeleno Heights.
Owner: George & Charlotte Lento
Architect: Ellingson & Chambers
Contractor: A. S. O'Neal Co.
Cost: \$2,900.00
- September 26, 1928: Building Permit No. 26833 to construct a 1-story 8-room 21' X 52' brick masonry 2-unit 1288¼ and 1290 Sunset Boulevard on Lot 41, Block 28, Angeleno Heights.
Owner: George & Charlotte Lento
Architect: Ellingson & Chambers
Contractor: A. S. O'Neal Co.
Cost: \$4,500.00

- September 26, 1928: Building Permit No. 26830 to construct a 2-story 5-room 21' X 38' 6" brick masonry apartment and store at 1292½ and 1288 3/8 Sunset Boulevard on Lot 41, Block 28, Angeleno Heights.
Owner: George & Charlotte Lento
Architect: Ellingson & Chambers
Contractor: A. S. O'Neal Co.
Cost: \$6,000.00
- April 4, 1929: Building Permit No. 9165 as property on East side is excavated for new building. We wish to underpin this building to the depth of the new excavation at 1288¾ Sunset Boulevard.
Owner: George Lento
Architect: None
Contractor: A. S. O'Neal Construction Co.
Cost: \$200.00
- March 31, 1944: Building Permit No. 5012 to apply 1 layer of 15 lb felt & 1 cap sheet of 190 lb mineral surfaced roofing over present built up roof on this building only, at 1290½ Sunset Boulevard. 8 units on lot. The rear unit only to be roofed.
Owner: Ted Young
Architect: None
Engineer: None
Contractor: Bilt Well Roof Material Company
Cost: \$160.00
- December 6, 1944: Building Permit No. 21328 to reroof with 1-16 and El Rey Metalite with hot asphalt.
Owner: Ted Young
Architect: None
Engineer: None
Contractor: D. K. Whittet
Cost: \$315.00

- September 29, 1987: Building Permit No. LA77034 for full compliance with Div. 88 for retail and apartment at 1288 Sunset Boulevard.
Owner: Peter L. Lau
Architect: None
Engineer: Richard Shiotsugu
Contractor: Not Selected
Cost: \$10,500.00
- September 29, 1987: Building Permit No. LA77035 for full compliance with Div. 88 for retail and apartment at 1292 Sunset Boulevard.
Owner: Peter L. Lau
Architect: None
Engineer: Richard Shiotsugu
Contractor: Owner Builder
Cost: \$8,200.00
- September 22, 1988: Building Permit No. LA11068 to change contractor on line 10 for retail and apartment at 1292 Sunset Boulevard. File with permit # 87LA77035.
Owner: Peter L. Lau
Architect: None
Engineer: Richard Shiotsugu
Contractor: Dan Ward Construction
Cost: \$201.00
- September 22, 1988: Building Permit No. LA11069 to change contractor on line 10 for retail and apartment at 1288 Sunset Boulevard. File with permit # 87LA77034.
Owner: Peter L. Lau
Architect: None
Engineer: Richard Shiotsugu
Contractor: Dan Ward Construction
Cost: \$201.00

October 16, 1992: Building Permit No. HO19873 to install security bars with quick release devices. [A copy of this permit must be forwarded to the security bar program, Conservation Bureau.] 90 day permit.
Owner: Eddie Dong
Architect: None
Engineer: None
Contractor: Owner
Cost: No fee in compliance with Section 91.0204 L.A.M.C

May 22, 2003: Plumbing Permit No. WO34216422 to install water heater at 1288¾ Sunset Boulevard.
Owner: D and H Management
Architect: None
Engineer: None
Contractor: Hollywood Plumbing Inc.
Cost: Not Shown

May 22, 2003: Plumbing Permit No. WO34216423 to install water heater at 1290 Sunset Boulevard.
Owner: D and H Management
Architect: None
Engineer: None
Contractor: Hollywood Plumbing Inc.
Cost: Not Shown

May 22, 2003: Plumbing Permit No. WO34216424 to install water heater at 1292 1/8 Sunset Boulevard.
Owner: D and H Management
Architect: None
Engineer: None
Contractor: Hollywood Plumbing Inc.
Cost: Not Shown

May 22, 2003: Plumbing Permit No. WO34216425 to install water heater at 1290½ Sunset Boulevard.
Owner: D and H Management
Architect: None
Engineer: None
Contractor: Hollywood Plumbing Inc.
Cost: Not Shown

May 22, 2003:

Plumbing Permit No. WO34216426 to install water heater at
1292½ Sunset Boulevard.

Owner: D and H Management
