MOTION

The community adjacent to the Van Nuys Civic Center is supporting efforts to revitalize the area to allow for new, neighborhood-serving businesses. Unfortunately, space for additional parking is severely limited and the City is examining how to provide more parking for new businesses to foster economic development.

LADOT currently owns and operates several parking facilities in the Van Nuys Civic Center, which operate during the daytime. The community has expressed interest in allowing the public to use these parking lots during the evening. It is important that the City explore efforts to maximize the use of all available parking facilities.

I THEREFORE MOVE that the Council direct the Los Angeles Department of Transportation to report on options to allow the City's surface lots in the Van Nuys Civic Center to remain open until 2:00 AM for public use to support the surrounding commercial and retail businesses.
