

Proposed Sewer Service Charge

10-1947
PROTEST

Questions from: APN: 43630007186; Service Address: 10982 Roebling Ave. No. 509

- 1) With a lot of respect, how can you justify that the Sewer Service Charge in the city of Los Angeles is 36% higher than in the city of Burbank and 48% higher than in the city of Pasadena? (This is according to your own data)
- 2) Have you looked at why are the sewer systems of the cities of Pasadena and Burbank more efficient than the city of Los Angeles? Have you considered making your sewer system more efficient, rather than increasing the sewer charges above expected inflation for ten years?
- 3) I believe that the increases that you propose are unacceptable, with hardly an explanation of why they are necessary. Your customers (myself being one of them) deserve a full written explanation of what measures are being taken to make the sewer system more efficient and reduce rates over the next ten years (not increase them), so that they become comparable to the leading cities such as Burbank and Pasadena.

Thank you,

Daniel Renner
