Update of Los Angeles River Projects

Subject:

Los Angeles River Projects 2012 Second Status Report

SUMMARY

On February 27, 2006, the Ad Hoc River Committee requested that this Office report on the status of Los Angeles River Revitalization projects. This report provides information on capital projects relating to or adjacent to the Los Angeles River. The summary is based on information provided by project staff from the Bureau of Engineering (BOE), the Bureau of Sanitation (BOS), the Department of Transportation (DOT) and the Department of Water and Power (DWP).

SUMMARY OF CURRENT PROJECTS

A summary of the City's River Revitalization Projects is included as Attachment 1. A brief description is provided for each project as it relates to the Los Angeles River revitalization effort. Currently, there are 37 on-going capital projects with budgets totaling approximately \$1.067 billion. Eighteen of these projects are bridges which traverse the Los Angeles River and various flood control channels. The remaining projects include recreational bike paths, parks and facilities, water quality projects, riparian system restoration and the implementation of the Los Angeles River Revitalization Master Plan. The total estimated expenditure for 2011-2012 is \$63.5 million. The report also includes a listing of 19 completed projects with a total budget of \$97 million. Funding for these projects is provided through a variety of funding sources as indicated on the attachment.

BUDGET IMPACTS ON RIVER PROJECTS

At the Ad Hoc River Committee meeting held on January 23, 2012 the Committee asked that our Office report back on impacts that current budget conditions have had on river-related projects. While most of the funding for these projects comes from sources other than the General Fund, the financial situation has affected some projects as noted in the following discussions.

Bridges

The current budget conditions have not had a significant effect on the Bridge Improvement Program (BIP). Bridge widening and renovation/ replacement projects are primarily funded through a combination of Federal Highway Bridge Program funds, State Proposition 1B Transportation funds and grants through the Metropolitan Transportation Authority. Local

match funding has been provided through the Seismic Bond (Proposition G), Gas Tax, Measure R and in small part through the Capital Improvement Expenditure Program funds. However, additional funding may be needed in the future. A recent review of the BIP projected a potential need for an additional \$15.4 million in program contingency over the next seven years of the program. No shortfall is projected during the current year. However, additional contingency funding may need to be identified if shortfalls are realized for individual projects as the program moves to completion. Depending on the project and the level of Federal and State participation, General Funds as well as other funding sources may be needed to complete these projects.

North Atwater Park Expansion

This park expansion project was opened to the public on April 12, 2012. Additionally, the North Atwater Creek Restoration Project is nearing completion and the maintenance of that portion of the park will be turned over to the Recreation and Parks Department (RAP) in December of this year. Since completion of these projects was anticipated, \$31,000 was provided in the current year budget for the increased costs of operating a larger facility. RAP estimates that after this initial year, the cost of park maintenance will be approximately \$25,000.

Los Angeles Riverfront Park

Execution of the Land Use Agreement between the City and Los Angeles County has been significantly delayed (by approximately 14 months) due to staff reductions in the City Attorney's Office, RAP, and the County. The Agreement is now in place and construction bids are anticipated in early May 2012.

Canoga Park Greenway

The Canoga Park Greenway has been removed from the Concept Section since the project is inactive and did not receive the State funds that were applied for. The area is now being considered for other projects such as the Los Angeles River Bikeway Network, a Partnership between the Department of Transportation and BOE, which will focus on five miles of bikeways along the River in the San Fernando Valley and approximately 20 miles of bicycle facilities on streets connecting the Valley to downtown.

Albion Dairy

The Albion Park project was awarded \$5 million in the second round of State Proposition 84 funding. The project involves development of the recently acquired 6.3 acre parcel located on the east bank of the Los Angeles River adjacent to the existing Downey Park. Park features will include construction of a new multipurpose athletic field, walking and bike paths, a fitness zone with equipment, a children's play area, a picnic area, an outdoor amphitheater, open space, a seasonal bioswale, a parking lot, lighting and landscaping.

BOE River Project Office Staffing

The Mayor's 2012-13 Proposed Budget provides continued resolution authority and funding for two staff positions in the BOE River Project Office. These positions will support the implementation of the Los Angeles River Revitalization Master Plan and include one Environmental Supervisor II and one Senior Civil Engineer.

RECOMMENDATIONS

Note and file.

FISCAL IMPACT

There is no fiscal impact associated with this status report. The report is for information purposes only.

MAJOR PROJECTS DESCRIPTION S				Funding Source	Project Budget	Timeline and Duration of Project	2011-12 Estimated Expenditures
	BRIDGE PROJECTS		<u></u>	A CONTROL OF THE PROPERTY OF T	Van Vinceninio		
1	RIVERSIDE DRIVE OVER LOS ANGELES RIVER (0160 AND 1932) - BRIDGE REPLACEMENT AND BIKEWAYS	This project involves the demolition of the existing Riverside Drive bridge and viaduct structures and replacement with a standard single curve bridge/grade separation that is approximately 900 feet in length. The replacement structure will cross the Los Angeles River, Avenue 19, and the Metrolink tracks and be striped as a two-lane bridge which flares to 4 lanes at the new roundabout. The replacement structure will also accommodate a 12 footwide Class I bike path which will enable a continuous bike connection from LA River Phase 1C segment to downtown. As part of this project, the City also proposes to reconfigure the existing Riverside Drive/San Fernando Road/Figueroa Road intersection into a two-lane roundabout. Various art components will be included as part of the overall project.	CONSTRUCTION	HIGHWAY BRIDGE REPLACEMENT & REHABILITATION PROP 18 MTA PROP C	58,000,000	YEAR 10 OF 13	12,000,000
1	NORTH MAIN OVER LOS ANGELES RIVER (1010) -BRIDGE SEISMIC RETROFIT	The project provides for the seismic retrofit of the North Main Street bridge which will include refurbishment of the original bridge railings, ornamental lamp posts, sidewalks and keystones. 	PARKS & FACILITY PROJECTS							
1	SUNNYNOOK RIVER PARK - CONSTRUCT A PARK ALONG THE RIVER WITHIN CALTRANS & LADWP LAND	The Sunnynook River Park project is a multi-benefit project that will create a greenway/infiltration park in a five-acre area along the existing bike path on the west side of the Los Angeles River. The area will serve as a rest area for pedestrians and cyclists, be landscaped with native vegetation and include picnic areas, benches, educational signage and art.		ENVIRONMENTAL ENHANCEMENT MITIGATION PROGRAM MOUNTAINS RECREATION AND CONSERVATION AUTHORITY	1,700,000	YEAR 4 of 5	800,000	
2,5,6	LOS ANGELES RIVERFRONT PARK - PHASE II GREENING, PEDESTRIAN AND BIKE PATH ALONG STUDIO CITY, SHERMAN OAKS, ENCINO AREA	This project involves the development of a new multi- purpose pedestrian/bike path predominantly along the south bank of the LA River from Sepulveda Basin to Universal City. Improvements adjacent to the river include irrigation, planting, paving, ramps, signage, and fencing, as well as a small community "greenbelt" park. This phase focuses on two LA River reaches located between Sepulveda and Kester Avenues (South bank), Coldwater Canyon and Whitsett Avenues (North bank), and Van Nuys Bivd to Cedros Avenue (South Bank).	BID & AWARD	PROPOSITION K	4,500,000	YEAR 3 OF 6	692,857	
4, 13	CONSTRUCTION OF UNDERGROUND	The Department of Water and Power will install two underground water tanks (54 and 56 million gallons) near Griffith Park to replace the Silver Lake and Ivanhoe reservoirs. This is part of the Headworks spreading grounds project which includes wetlands restoration.	DESIGN / LADWP Board has approved award to CM at Risk to begin work in early January		215,000,000	YEAR 4 OF 11	11,000,000	
4,13	HEADWORKS ECOSYSTEM RESTORATION PROJECT - PARTNERING WITH THE ARMY CORPS TO DEVELOP WETLANDS, HABITAT RESTORATION AND OTHER PUBLIC BENEFITS TO FORMER HEADWORKS SPREADING GROUNDS	This project involves restoration of the wetlands habitat and native landscaping located on the western half of the former Headworks Spreading Grounds site. This project is a joint effort of DWP and the Army Corp of Engineers. It will be started once the Reservoir Project has been completed (currenty anticipated in 2018). 	TAYLOR YARD BICYCLE/PEDESTRIAN BRIDGE - DESIGN, R.O.W. AND CONSTRUCTION OF A BICYCLE/PEDESTRIAN BRIDGE OVER THE L.A. RIVER AT TAYLOR YARD	This project is a result of a Memorandum of Understanding between the MTA and City of Los Angeles to provide a safe and convenient bicycle and pedestrian link between the Los Angeles River Bikeway (on west bank) and the Taylor Yard (on east bank). The current phase of the proposed bikeway improvement will consist of a minimum 15-foot wide bridge over the River, and a minimum 12-foot wide connection to the Union Pacific's Taylor Yard property. City staff is working with MTA to secure \$1.5 million in funds for design. Previously allocated funds lapsed when the project was unable to secure Union Pacific's (UP) approval for the atgrade crossing. At that time, only the conceptual design was completed. Since then, UP has granted approval and once funds are secured, the project design can continue.		MTA		•	YEAR 3 OF 6		
	ALBION PARK PROJECT - PARK DEVELOPMENT AND STORMWATER QUALITY IMPROVEMENT	The project involves development of the recently acquired 6.3 acre parcel located on the east bank of the LA River adjacent to the existing Downey Park. MAJOR P	ROJECTS DESCRIPTION	Status	Funding Source	Project Budget	Duration of Project	Estimated Expenditures
3 CANOGA AVENUE OVER LOS ANGELES RIVER (1116) - BRIDGE WIDENING	This completed project included the retrofit, and rehabilitation of the Canoga Avenue Bridge. Improvements included new reinforced concrete pier and abutment extensions to include shallow spread footings and deep piles, resulting in the permanent placement of concrete within the river channel. The existing bridge deck was widened by 17 feet on the westerly side to provide more sufficient shoulders and a safer, wider sidewalk. Other Improvements included bridge approach roadways and transition guardrails, construction of new architectural barriers (bridge railings) and painting of the steel girders.	COMPLETED	SEISMIC BOND, HIGHWAY BRIDGE REPLACEMENT & REHABILITATION	2,770,000		The state of the s
3 CORBIN AVENUE OVER LOS ANGELES RIVER (1144) - BRIDGE WIDENING & SEISMIC RETROFIT	This completed project scope included widening the bridge deck by 10 feet and construction of a new substructure, improvement of bridge railings, road approaches and the transition guardrail. Built in 1957, the bridge is 152 feet long.	COMPLETED	SEISMIC BOND	2,500,000		
3 MASON AVENUE BRIDGE OVER LOS ANGELES RIVER(1244) - BRIDGE WIDENING 8 SEISMIC RETROFIT	This completed project scope included widening the bridge deck by 10 feet and construction of a new substructure, and improvement of the bridge railings, road approaches and transition guardrails. Built in 1958, the bridge is 202 feet long.	COMPLETED	SEISMIC BOND	2,500,000		
4 FERRARO SOCCER FIELDS - IMPROVEMENTS TO SOCCER FIELDS, RESTROOMS, AND PICNIC AREAS	Improvements to the existing Soccer Field included regrading, re-seeding, installation of new bleachers, scoreboard, and goal posts; new decomposed granite walkways for disabled access, construction of a chain link fence around the perimeter, expansion of the parking lot.	COMPLETED	PROP K, GENERAL FUND	1,009,923		
13 LA RIVER WALK PATH SIGNAGE FOR EMERGENCY RESPONSE - PILOT PROGRAM	This pilot project involved installation of signage along the LA River for emergency response.	COMPLETED	GENERAL FUND	6,000		
3 OROS STREET - STREET GREENING PROJECT	This project included construction of five curb side storm water gardens in the street parkway and a large infiltration gallery beneath Steelhead Park. North East Tree provided an additional \$586,651 to complete this project.	COMPLETED	PROP O	197,600	ž.	
3 L.A. RIVER BIKE PATH PHASE 1C - DESIGN AND CONSTRUCTION OF A CLASS I BIKE PATH - FLETCHER DR. TO BARCLAY ST.	This 2.5 mile bike path has been constructed between Barclay Street and Fletcher Drive along the west bank of the river. Greening of the site will be completed concurrently by the Mountains Recreation and Conservation Authority as a separate project. The Project was opened to the public in Deceber 2010.	COMPLETED	MTA, PROP C TRANSPORTATION DEVELOPMENT ACT FUNDS	5,000,000		
13 RIVERDALE AVE GREEN STREET PROJECT - INSTALLATION OF STREET INFRASTRUCTURE TO IMPROVE STORM RUNOFF INFILTRATION ON RIVERDALE AVE BETWEEN CRYSTAL ST. AND THE LA RIVER.	This project improved water quality by capturing the initial three fourths inch of rainfall for treatment of potentially contaminated storm water. Sidewalks and curbs on both sides of the street between Crystal Street and the river were reconstructed to include storm water gardens in front of residences and swales to encourage infiltration under the sidewalks.	COMPLETED	STATE COASTAL CONSERVANCY	500,000		
,9, CATCH BASIN INSERT AND COVERINGS 3,1 PROGRAM PHASE 1 ,15	This project involved installation of catch basin inserts and screens to reduce the amount of trash entering the LA River and Ballona Creek.	COMPLETED	PROP O	14,702,886		1849-06-19 1876 (1869-1860) de Arien (1860) de
