RE: Clean Up Green Up motion – CF 11-0112
sent by e-mail

Dear Councilmember Sharon Gin:

Maternal and Child Health Access urges members of the Planning and Land Use Management Committee and the full of the Clean Up, Green Up motion, CF 11-0112.

The Clean Up Green Up initiative is an innovative yet balanced solution to the problem of the overconcentration of p schools, parks and other sensitive uses. This approach involves creating overlay districts in the three pilot communiti Wilmington—combining economic incentives with traditional planning tools, and promoting collaboration among go businesses. It makes good sense in difficult economic times to reduce existing levels of pollution while providing inc businesses to clean up and green up, and to attract new green businesses to our community.

The Clean Up Green Up policy proposal complements other important environmental initiatives taking place in Los / Quality Management District's (AQMD) Clean Communities Plan. This voluntary program seeks to reduce the expo District, with emphasis on cumulative impacts. We are excited about the potential for synergy and collaboration betw Up pilot program and AQMD's efforts.

Maternal and Child Health Access endorses the Clean Up Green Up motion because it demonstrates that working to residents can develop meaningfully solutions to the problem of air pollution that not only protect public health but als where businesses can thrive.

Thank you for your time and attention to this matter.

Sincerely,

Untitled
