To Whom It May Concern:

I am asking that you please do not let Best Friends use our NE Shelter that has closed. There are other facilities out there they can rent and use. People like myself paid tax dollars out of my own pocket to have NE built, not fully open and too close when we need it. At least even if it was not fully open it was helping with evidence animals, pregnant animals, etc. The shelters are all overcrowded right now and this just make the situation worse. This also includes the animals for the transports that was being done at NE and is now is being done somewhere else. Which means less room at that shelter. It sickens me to think we can close a shelter that was being used and helping the situation only to provide it to Best Friends. Why does Best Friends need it so bad? How is this going to help our shelters not be so overcrowded? How is this going to help us not euthanize more animals? Well the reality is, it isn't. It is only making matters worse and the losers are always the animals. They lose their life! Please do not let this happen, especially for the animals lives that are a t stake. And for those tax payers who will not be happy.

Thank you for taking the time to read this.

Sincerely,
Gina Henning
