Dear Mr Lid,

I represent a growing community group in the Westlake neighborhood of the city. We have been working successfully with councilman Mitch O'farrell's office to work through the many issues that arise in our community.

A few months back our neighborhood was seemingly transformed overnight with the widespread news that it was legal to park on grass ways between the side walk and the street. On any given day we have roughly 30-40 vehicles parked on these areas within just a few blocks. The solution to our dense neighborhood parking issues is not to destroy the current infrastructure we have; It is both unattractive, unsafe and will cost the city streets department more the longer this continues.

We support the modification of the parkway prohibition and encourage this becomes enforced immediately.

Regards,

Stephen Sedalis
