**Comments for Public Posting:** I agree with this motion to pass. Not in only in our International Airport. LAX. But all across Southern California and the State itself. Are schools, parks and recreation summer programs. After school programs. We are #1 obese country amongst kids in the entire world. We as a society, have to stop and think. About our children of this country. And world. I think it's imperative to give knowledge and awareness to everyone. In this beautiful city of ours. Food is just one of our problems. Food is a big part of a lot of natural resources. We could be using. Rather than abusing innocent animals.

**Comments for Public Posting:** I support this motion, because access to vegan protein options is crucial in helping Los Angeles lead the way in sustainability, while also reducing the suffering of animals on factory farms. People in Los Angeles want to do the right thing and choose the option that is better for the planet, the animals, and their health. However, in order to do make a choice aligned with their values, they must have the options available to them. As plant-based products soar, there is every reason for Los Angeles to lead the way in mandating vegan protein options at certain LA venues. Please support Councilmember Paul Koretz's Motion for vegan protein options in LA. Thank you in advance for supporting this incredibly important matter.

**Comments for Public Posting:** It would be amazing to see Los Angeles lead in the effort to save our planet. It's well documented that a plant-based diet places much less stress on the environment, leaves a meaningfully lighter environmental footprint. In order to bring about the change we need in our race against time, it's going to take each & every one of us to do our part. Making a plant based option readily available at highly frequented venues such as LAX would be incredibly impactful. In the words of Greta Thunberg, "We can create transformational action that will safeguard the future living conditions for humankind, or we can continue with our business as usual and fail. That is up to you and me." Thank you for your efforts and hard work.
