**Comments for Public Posting:** Los Angeles is an enormous city with a variety of people. More and more people are beginning to eat vegan food. This is why supporting this growing population by including vegan protein at establishments is crucial. This also will lead to more people buying those products. I know I will! Please support Councilmember Paul Koretz's Motion for vegan protein options in Los Angeles.

**Comments for Public Posting:** Access to vegan protein options is crucial for those who are looking to reduce the suffering of animals on factory farms and those who want to reduce the impact of intensive animal farming on the planet. We can make this happen and help the world become a better place. Please support Councilmember Paul Koretz's Motion for vegan protein options in Los Angeles.

**Comments for Public Posting:** Please consider adding more plant-based options in LA. Plant-based options help prevent cruelty and deaths of over 70 billion animals. They also help save the planet from global warming and deforestation. Plant-based food is part of the equation to save our species and every other being on this planet. Eating a plant-based diet is healthier for our bodies and prevent serious ailments like cancer, diabetes, and heart disease to name a few. For the sake of the people I ask you to make the right decision and give them an option to choose healthy sustainable food options. The future is vegan if we are going to have a future at all.
