**Comments for Public Posting:** I support Councilmember Paul Koretz's Motion for vegan protein options in Los Angeles. Giving people access to healthier and more animal and climate friendly food is an important step for Los Angeles. I am proud to be a Los Angeles resident due to the city's progressive animal welfare policies and hope this motion will help us become an even stronger example for how a city can take action of supporting residents' health, slowing the rate of climate change and decreasing animal suffering.
