**Council File No:** 11-1705

**Comments for Public Posting:** You can barely see the stars at night in Los Angeles in part due to light pollution. It interferes with our circadian rhythm, which is hazardous to our health. Digital billboards will increase that pollution exponentially. They are hugely distracting to drivers and a total eyesore. The light blue billboard by the 10 and 110 interchange has to go. How was it allowed in the first place? Stop 11-1705. Stop the proliferation of digital boards.
