**Comments for Public Posting:** I am in favor of more digital advertising billboards being put up in Los Angeles. As long as they are maintained, they look nicer than regular billboards.

**Comments for Public Posting:** Dear LA City Council, You should not deny or alter the very popular billboard ban. You should not allow digital signs in our neighborhoods. I will be voting on this issue, and watching very closely. You should at the very least make every company do Impact studies for for traffic, environment, building and cyber safety. It would also be good if you included the community in determining if they want signs in their neighborhoods at all. It is only fair. They are the ones that are going to have to put up with them. **Comments for Public Posting:** There are 1000's of illegal signs that got put up since you banned billboards by the same companies you are now trying to help with this. It is ridiculous. Make them take them all the illegal ones down before they can put up more. These digital signs are obnoxious and will ruin the feel of LA. We are not Las Vegas. Am I right to understand that you want to put them up on city property? They are distracting - we have a cell phone ban already to protect drivers from being distracted and now you want these things? I don't understand what you are thinking. Please consider making the sign companies do the right thing and remove all their illegal signs, and not consider putting up these monstrosities.
