COUNCIL FILE NO. 11-1912 - NEIGHBORHOOD COUNCIL ELECTIONS

As requested by your Honorable Body, this department submits this report back to the City Council summarizing the administration of the 2012 Neighborhood Council elections.

Background

On May 9, 2012, the City Council took action to transfer authority for conducting the Neighborhood Council elections from the Office of the City Clerk to the Department of Neighborhood Empowerment (Department) on a temporary basis for the 2012 Neighborhood Council election cycle.

Prior to the close of the 2011-2012 fiscal year, the Department had begun planning and preparing for an election cycle to run from August through November of 2012. In collaboration with the Office of the City Clerk and with Neighborhood Councils, the Department set forth a new process for a regional election cycle with Independent Election Administrators (IEA) supervising each region. See Attachment A. The Department also used as-needed staff to run back office support for the IEAs, which included candidate and stakeholder verification, ballot preparation/tallying, bylaws and election procedures preparation, polling supplies, database set-up and maintenance, vote-by-mail and post survey collection among other tasks.

Neighborhood Councils could hold either an election or selection process to choose their Board members. The Department administered the elections only. Neighborhood Councils choosing the selection process sought outside volunteer Neutral Third Parties to assist in their selections. In order to save costs, the Department held shortened election hours where fewer than three (3) seats were contested in an election and a Board Affirmation in lieu of an election where no seats were contested.

Election Results

Out of the ninety-five (95) Neighborhood Councils, the Department conducted seventy-five (75) elections and five (5) Board Affirmations. Three (3) Neighborhood Councils did not Honorable Members of the Education and Neighborhoods Committee Page 2 of 7

have enough candidates to meet quorum and fell under the Board of Neighborhood Commissioners' Loss of Quorum Policy where they held special selections instead under the Department's guidance. Nine (9) Neighborhood Councils conducted their own selections. Citywide, there were 19,025 voters in the elections and 1546 candidates for 1103 open seats, resulting in a 28% increase in candidates to open seats and 15% increase in voters to open seats from 2010. There were 461 incumbents and 469 new voices to the Neighborhood Council system elected to the Boards. See Attachment B.

On the polling day, the Department provided surveys to voters so they could weigh in on local issues that concerned them as well as on their polling experience. The Department adjusted its services based on these surveys during the election months and provided the survey results regarding community concerns to the Neighborhood Councils.

The Department and Neighborhood Councils recruited 429 volunteer poll workers during the course of the elections to assist in running the polls. Regarding innovations in the election process, the Department successfully tested the implementation of online candidate applications and instant runoff voting.

Outreach

The success of the elections was due in part on the Department's encouragement to the Neighborhood Councils to focus on more outreach for candidates instead of voters with the idea that contested elections with quality candidates will bring out the voters. As a result, despite having 233 fewer seats up in 2012, there were eighty-seven (87) more candidates than in 2010. Outreach for the 2012 Neighborhood Council elections was conducted citywide by the Department, regionally by IEAs and the Neighborhood Councils and locally by the individual Neighborhood Councils.

Using the brand of "EmpowerLA," the Department conducted twenty-six (26) EmpowerLA Leadership Academy Workshops throughout the city in preparation for the elections, followed by eleven (11) Candidate Workshops, eight (8) Poll Worker Workshops, and dozens of Candidate Forums. The Department also built a website, www.empowerla.org, for the elections and maintained information on the Neighborhood Council system, candidates, challenges, polling information and election results. During the elections, the website averaged 2,632 hits per day.

Citywide outreach resulted in editorials in both the Los Angeles Times and the Daily News, addressing the 2012 Neighborhood Council elections and the opportunity for stakeholders to get involved as candidates, voters and volunteers.

Eleven (11) IEAs worked with Neighborhood Councils in the twelve (12) election regions on regional outreach activities that included traditional print campaigns, digital social media strategies, public events and partnerships with neighboring community organizations.

Individual Neighborhood Councils advertised in local newspapers, distributed flyers and door hangers, hosted community events that highlighted the candidates and the issues, and created election events that were bigger than the election. These include the Boyle Heights community picnic, the West Hills 25th Anniversary community fair, the Tarzana 75th Anniversary celebration, the Reseda Centennial festival, the Voices of 90037 barbeque and Park Mesa's outreach teams at local concerts.

Honorable Members of use Education and Neighborhoods Committee Page 3 of 7

The Department staff collected contact data from the voters and compiled outreach files for each Neighborhood Council as part of the Department's commitment to connecting stakeholders with their Neighborhood Councils and Neighborhood Councils with City Hall even beyond the elections.

Challenges

The Department set up an online challenge submission process and received forty-four (44) challenges in seventeen (17) Neighborhood Council elections. See Attachment C. Election Challenges could raise more than a single issue, ranging from candidate eligibility to use of the city seal and ballot duplication. Challenges were reviewed initially by the Department for timeliness, relevance per allowable challenges and submitted evidence in support of valid challenges before submission to an arbiter for final review. There were no challenges that met all criteria, and as such, all were dismissed.

Election Costs

2011-2012 Fiscal Year Funds (\$120,000)

The Department started to prepare for the elections in April 2012, utilizing the \$120,000 set aside for election outreach in the 2011-2012 fiscal year to establish the election structure and begin outreach to meet the August through November 2012 election timeline.

2012-2013 Fiscal Year Funds (\$550,000)

Of the \$550,000 set aside for the elections in the 2012-2013 fiscal year, the Department administered the elections at a cost of \$444,654.96, resulting in over a \$100,000 savings. Twenty-three (23) Neighborhood Councils utilized vote-by-mail, paying the minimum \$500 set up fee and additional postage fees for over 200 pieces, which totaled \$12,295 charged against the Neighborhood Councils. The costs broke down in the following manner:

- \$412,057.71 Staffing (4 Project Coordinators, 11 IEAs, As-Needed Back Office Staff, Poll Managers/Assistants)
- \$5,632.35 Mileage
- \$12,450.32 Supplies
- \$13,182.08 Printing
- \$5,077.50 Location Fees
- \$8,550 Office Equipment

Election Encumbrance Outreach

Neighborhood Councils encumbered \$444,704.28 from their 2011-2012 funds. In order to claim these funds, Neighborhood Councils had to submit an election outreach encumbrance reconciliation form to the Department two (2) weeks after their elections. If this form was not submitted, the election expenses of the Neighborhood Council would be taken out of current year funds. The Department extended this deadline to December 7, 2012, notifying all Neighborhood Councils who had not submitted the reconciliations of the deadline with both emails and calls. Those Neighborhood Councils that did not submit their reconciliation forms or did not utilize all of their encumbered funds had their encumbered election

Honorable Members of time Education and Neighborhoods Committee Page 4 of 7

outreach funds swept. The Department is still receiving outstanding election invoices from Neighborhood Councils who submitted their reconciliation forms in a timely manner and estimates the final amount of the encumbered election outreach funds to be swept as \$150,000.

2013-2014 Fiscal Year Request (\$685,338)

The Department submitted a budget request for the elections in the 2013-2014 fiscal year in the amount of \$685,338:

- \$315,338 Salary for 1 Project Coordinator, 1 Project Assistant, As-Needed staffing for back office and poll workers
- \$35,000 Printing and Binding
- \$35,000 Office and Administrative
- \$300,000 Contractual Services to cover IEA stipends, translation, arbiters, mediation, citywide outreach campaign

Considerations for the 2014 Election Cycle

Multiple Ballot Types and Vote-by-Mail

Because of the varying Board structures, the Department created 291 unique ballots and the number of ballot types per Neighborhood Council election ranged from one (1) to twenty-one (21). The Department noted that the more ballot types there were, the more confused stakeholders were as to what ballot they qualified for in the election. In the two (2) Neighborhood Councils with twenty-one (2) ballot styles, some stakeholders became so frustrated with the ballot types, they refused to vote. Some of the voter restrictions were structured so that even though there was a relatively high turn-out of voters, most candidates won with less than twelve (12) votes. In addition, printing costs for Neighborhood Councils with numerous ballot types were much higher with a lot of waste. The Department recommends those Neighborhood Councils with multiple ballot types, particular those with ten (10) or more, consider changing their voting structure. In lieu of such changes, there will likely be additional charges for the costs of developing more ballot types in the 2014 election cycle.

Vote-by-mail was optional and comprised 8.1% of the total ballots cast. The Department administered twelve (12) voter self-affirmation and eleven (11) voter documentation requirement vote-by-mail ballots for Neighborhood Councils. Because of the major complications with voters not wanting to provide documentation via mail, the Department recommends that vote-by-mail be available only to those Neighborhood Councils who require self-affirmation to verify stakeholders in the 2014 election cycle.

Factual Basis Stakeholder Definition

During the 2012 elections, the issue of stakeholders who can qualify to vote based on a single receipt purchase became a concern for several Neighborhood Councils whose Board structures allowed such "factual basis" stakeholders to vote for all seats. The Department implemented the same documentation requirements set forth by the Office of the City Clerk in 2010, which allowed for the submission of a receipt of purchase in a local store to qualify a voter in documentation required Neighborhood Councils as a factual basis stakeholder.

Honorable Members of the Education and Neighborhoods Committee Page 5 of 7

i.e. a stakeholder other than those who live, work or own property within the Neighborhood Council boundaries.

Since 2009, Neighborhood Councils have been counseled by the Department, the Board of Neighborhood Commissioners, the Office of the City Attorney and the Office of the City Clerk to change the voter requirements of their Board structures if they had concerns about factual basis voters. Because of alleged take overs of Neighborhood Councils by factual basis voters in the 2010 elections, the Board of Neighborhood Commissioners set forth policy recommending Neighborhood Councils change their Board structures to limit Board seats for which factual basis stakeholders can run and vote to no more than 10% of the total number of Board seats. Many Neighborhood Councils did make this change, reducing the number of factual basis voters from 3225 in 2010 to 2167 in 2012. See Attachment D.

After the 2012 elections, Councilmember Jose Huizar introduced a motion to limit the number of factual basis stakeholder seats to no more than 25% of the total Board seats. On Wednesday, January 9, 2013, the Department met with representatives from Council District 14, the Office of the City Attorney, the Chief Legislative Analyst and the City Administrative Officer to discuss the recently administered Neighborhood Council elections. The meeting participants discussed methods for improving future Neighborhood Council elections and discussed concerns arising from the definition of factual basis stakeholders.

The Office of the City Attorney advised that City Charter Section 905 defines stakeholders to include those who live, work or own property in the neighborhood. Such stakeholders are each characterized by their substantial and ongoing commitment to the community. The City Attorney further explained that the current implementing ordinances of the City expand on the Charter definition by adding to stakeholders those persons who declare a stake in the neighborhood and affirm the factual basis for it, e.g., the factual basis stakeholder. The parameters of a "factual basis stakeholder" are not more particularly set forth in the implementing ordinances.

During the recently administered Neighborhood Council elections, several media outlets reported on stakeholders demonstrating their eligibility to vote by showing a purchase receipt. This caused concern with several Neighborhood Councils who questioned the legal basis for treating people who may have purchased goods or services as having a community stake on par with those who live, work or own property. The Office of the City Attorney advised that this concern is real. The body of law on voting rights forbids both disenfranchising an eligible voter and overly enfranchising those who do not meet the eligibility mandates.

Three (3) avenues of possible solution were identified and discussed:

- (1) The definition of "factual basis stakeholder" should be clarified with unambiguous language;
- (2) This should lead to a reduced volume of voter challenges filed during an election, which volume might be further reduced through a voter pre-registration opportunity; and
- (3) Structural changes could be made to limit the number of seats on a Neighborhood Council's governing board for which "factual basis stakeholders" are eligible to run, thereby

Honorable Members of Le Education and Neighborhoods Committee Page 6 of 7

further reducing the likelihood that voters with insubstantial contacts in the community might succeed in taking over a Neighborhood Council.

With respect to these topics, the meeting participants offered several suggestions.

- (1) Factual Basis Stakeholder. The meeting participants discussed that the factual basis stakeholder definition should be amended by the City Council. City Council may wish to identify specific acts of participation that satisfy the stakeholder definition. For example, the definition could read: Stakeholders include those persons who live, work, or own property in the neighborhood, and those with a substantial and continuing interest in the community demonstrated by participatory activities such as school enrollment, religious institution membership, or regular service to a community-based organization. (The list of allowed organizations would need to be finite and defined so that the rules clearly specify who is a stakeholder or alternatively, the City Attorney advised, City Council could delegate to the Department or Board of Neighborhood Commissioners the authority to expand upon the list of stakeholder interests.) In addition, the definition should specify that stakeholder eligibility shall not be based upon the purchase of consumer goods, services, or items in a community. If these changes were made to the factual basis stakeholder definition, it would clearly preclude those persons who have simply purchased a consumer good from participating or voting in a Neighborhood Council election.
- (2) Voter Registration. The meeting participants suggested that a voter pre-registration process might be implemented by Neighborhood Councils. Neighborhood Council boards could evaluate and determine stakeholder status in advance of Election Day for interested voters, and place those applicants who qualify on a voter pre-registration list. This list would then be provided to the election administrator on Election Day. The pre-registration process would reduce the expenditure of resources by the election administrator on Election Day by reducing the amount of voters whose stakeholder eligibility must be processed.
- (3) Neighborhood Council Governing Body. The meeting participants discussed the recommendation made by the Board of Neighborhood Commissioners that Neighborhood Councils allocate a minimum of one (1) or a maximum of 10% of their board seats to factual basis stakeholders. The Office of the City Attorney advised that if City Council desired to make the Commission recommendation mandatory, it could be achieved through a change to the City's Administrative Code.

The Board of Neighborhood Commissioners is currently reviewing the stakeholder definition in its review and revision of the Plan for a Citywide System of Neighborhood Councils with citywide participation from Neighborhood Councils. A revised stakeholder definition is anticipated from this process and will presented to the City Council for action before the end of the current fiscal year in preparation for the next cycle of election in spring of 2014.

Collaboration with the Office of the City Clerk for the 2014 Elections

The Department and the Office of the City Clerk have been in discussion for the past several months regarding the possibility of collaborating in the administration of the 2014 Neighborhood Council elections. In evaluating the strengths and weaknesses of the 2010 and 2012 elections, both the Department and the Office of the City Clerk agreed to codevelop a process that would utilize the individual strengths of the departments to increase the election efficiencies and outreach to the community.

Honorable Members of the Education and Neighborhoods Committee Page 7 of 7

Using the same 2012 election model with IEAs administering the elections, the Department will focus on election outreach and overall administration, and the Office of the City Clerk will provide the back office support of candidate verification, ballot preparation, database/survey development and maintenance, etc. The Department will incorporate the Office of the City Clerk's costs into its proposed election budget package of \$685,338 with the following adjustments:

Office of the City Clerk - \$115,000

- \$35,673 As-Needed Salaries
- \$20,000 Over time
- \$59,327 Election Expense

Department of Neighborhood Empowerment - \$570,338

- \$215,338 Salary for 1 Management Analyst II, 1 Project Assistant and poll workers
- \$35,000 Printing and Binding
- \$35,000 Office and Administrative
- \$285,000 Contractual Services to cover IEA stipends, translation, arbiters, mediation, citywide outreach campaign

This proposal will require a change in the existing election ordinance to accommodate the Department taking the lead on Neighborhood Council election administration. Therefore, the Department respectfully requests the City Council to instruct the Office of the City Attorney to begin preparation of the ordinance changes.

Conclusion

The success of the 2012 Neighborhood Council elections in the short time frame was due to the hard work and collaboration of the Department staff, especially the IEAs, and the Neighborhood Councils with the Mayor's Office, City Council, Chief Administrative Officer, Chief Legislative Analyst, Office of the Controller, Office of the City Attorney, and the Office of the City Clerk, who set a solid election foundation and assisted the Department during election preparations.

The Department looks forward to continuing with these partnerships in the administration of the 2014 Neighborhood Council elections.

If you have any questions regarding this matter, please contact me at (213) 978-1551. I will be available when you consider this matter in order to answer any questions you may have.

Very truly yours,

General Manager

rrosssans	EmpowerLA conducted 75 Neighborhood Council elections in 2012. There were 1103 open seats, 1546 candidates, and 19,025 voters. 44 Election Challenges were filed online, none were sustained.
en a vocale meno	
verrenve	17 Neighborhood Council elections received Election Challenges, Glassell Park received 13, PICO recieved 6, Palms recieved 4, Eagle Rock, Van Nuys; and Encino received 3 each, and West Hills received 2.
	Sylmar, Panorama City, MidTown NoHo, East Hollywood, Greater Wilshire, Historic Cultural, Pico Union, Greater Echo Park Elysian, Greater Griffith Park, and LA-32 received 1 Election Challenge each.
	Election Challenges could raise more than one issue, ranging from Candidate Eligibility to Use of the City Seal and Ballot Duplication.
	23 Election Challenges claimed that a Candidate was ineligible, none of the challenges rose to the level of a valid challenge. (Challengers were required to submit evidence to support claims)
	10 Election Challenges claimed that Voters were ineligible, none were sustained. Some were general complaints about non-residents voting, others were specific to factual basis voters.
	10 Election Challenges claimed that Candidates and their supporters engaged in Electioneering activities, charges that were contradicted by the reports of the IEAs, Election Monitors, and neutral third parties.
	7 Election Challenges claimed that Candidates benefited from Inappropriate Endorsements, charges that included comments on Facebook, at Candidate Forums, emails by supporters, and comments on Blogs.
	7 Election Challenges claimed that there were Issues with Ballots, including questions regarding the final fally, concerns over self-affirmation, confusion at a 21 Ballot election, and a candidate that falled to qualify.
	4 Election Challenges claimed that the Vote-by-Mail Applications and Ballots were not collected properly alleging that non-residents could vote that deadlines weren't enforced, and that ballots were received late.
	Election Challenges claimed that the locations were not ADA compliant. In all cases, there was curbside voting available to complement a commitment to ADA compliant facilities and voting accompdations.
	12 Election Challenges claimed "Campaign Material Issues," some lacking specificity while others addressed outreach, slate campaigning, youthful voters, use of a NC database, and campaign materials on public property
AND A STATE OF THE	

Attachment D - Neighborhood Council Election Regions and Factual Basis Voters

Region 1 - August 4th = 89

- 1. Sylmar = 25
- 2. Arleta = 0
