November 30, 2011

To Whom it may Concern:

The Mar Vista Community Council recently helped conduct an Urban Beekeeping Feasibility Study.

The Study concludes that there is a strong community interest in supporting beekeeping efforts and that doing so would result in positive changes that permit the healthy growth of honey bee colonies and increase the production and quality of fruits, vegetables and flowers in Mar Vista’s organic home gardens while providing a community service as a resource for the removal of feral (wild) hives.

Research indicates that such a program would be cost neutral to the city of LA.

The MVCC Board therefore recommends the implementation of a Beekeeping Pilot Program to test safety and develop best practices for future expansion.

We urge the City of LA to adopt a policy that includes conditions relating to maintenance, location, registration and notification to assure for the safety of all residents which may result in the continued preservation of quality of life and preservation of single-family residential districts.

Thank you for your consideration,

Sharon Commins,
Acting Chair
Mar Vista Community Council
