### **OPPORTUNITIES FOR MAKING BROADBAND AVAILABLE TO ALL ANGELENOS OURCYCLE LA – DIGITAL INCLUSION PILOT PROGRAM**

The City encourages interested parties to propose innovative ways to ensure that broadband is available to every Angeleno, and is particularly interested in receiving proposals in which the development of the CityLinkLA can be coordinated with the City's digital inclusion efforts.

Under the leadership of the Offices of the Mayor and City Council, the City of Los Angeles has implemented a digital inclusion pilot program, OurCycle LA, to take advantage of the thousands of salvage computers from the City. It is a collaborative public/private partnership between the City, non-profits, social enterprises and large corporate partners. The goals of the program are to maximize the use of the computers, provide job training and employment on computer refurbishing and recycling for individuals with high barriers to employment, minimize the City's electronic waste footprint, and help bridge the digital divide in Los Angeles.

OurCycle LA was officially launched on February 27, 2015. The limited supply of free refurbished computers is being distributed to low-income individuals or families in Council District 10, with focus on Baldwin Village and Koreatown. Qualified participants are required to attend a digital and financial literacy training program and sign up for low cost internet services. The refurbished computers will also be distributed to non-profit organizations throughout the City that operate public access computer centers serving disadvantaged communities.

OurCycle LA will be used as a model for future treatment of the City's electronic waste that will benefit low-income Angelenos, the environment, the local economy, and help develop the e-waste recycling sector in Los Angeles. To build on the success of OurCycle LA, the City desires to establish an on-going public/partner partnership digital inclusion program that is sustainable and helps further access and digital literacy for low income and disadvantaged residents of Los Angeles.

Below is a listing of the OurCycle LA partners, as well as some of the organizations in the Los Angeles County that provide digital inclusion services who may be potential partners for future digital inclusion efforts.

Also below is a listing of the community computer centers that are providing Internet access, job training and other services to neighborhoods throughout the City. The City seeks Digital Inclusion Plans that include 1 Gbps symmetrical services (wireline or Wi-Fi) to the community center locations.
