### **Scientific review finds no evidence e-cig vapor poses harm to users or nonusers.**

Igor Burstyn: Peering through the mist: systematic review of what the chemistry of contaminants in electronic cigarettes tells us about health risks.

*BMC Public Health* 2014, **14**:18 doi:10.1186/1471-2458-14-18

<http://www.biomedcentral.com/content/pdf/1471-2458-14-18.pdf>

## **Abstract Background**

Electronic cigarettes (e-cigarettes) are generally recognized as a safer alternative to combusted tobacco products, but there are conflicting claims about the degree to which these products warrant concern for the health of the vapers (e-cigarette users). This paper reviews available data on chemistry of aerosols and liquids of electronic cigarettes and compares modeled exposure of vapers with occupational safety standards.

## **Methods**

Both peer-reviewed and “grey” literature were accessed and more than 9,000 observations of highly variable quality were extracted. Comparisons to the most universally recognized workplace exposure standards, Threshold Limit Values (TLVs), were conducted under “worst case” assumptions about both chemical content of aerosol and liquids as well as behavior of vapers.

## **Results**

There was no evidence of potential for exposures of e-cigarette users to contaminants that are associated with risk to health at a level that would warrant attention if it were an involuntary workplace exposures. The vast majority of predicted exposures are < <1% of TLV. Predicted exposures to acrolein and formaldehyde are typically <5% TLV. Considering exposure to the aerosol as a mixture of contaminants did not indicate that exceeding half of TLV for mixtures was plausible. Only exposures to the declared major ingredients -- propylene glycol and glycerin -- warrant attention because of precautionary nature of TLVs for exposures to hydrocarbons with no established toxicity.

## **Conclusions**

Current state of knowledge about chemistry of liquids and aerosols associated with electronic cigarettes

indicates that there is no evidence that vaping produces inhalable exposures to *contaminants* of the aerosol that would warrant health concerns by the standards that are used to ensure safety of workplaces. However, the aerosol generated during vaping as a whole (contaminants *plus declared ingredients*) creates personal exposures that would justify surveillance of health among exposed persons in conjunction with investigation of means to keep any adverse health effects as low as reasonably achievable. Exposures of bystanders are likely to be orders of magnitude less, and thus pose no apparent concern.

<http://www.surveymonkey.com/s/5TBKPMK>

Obama's CDC Director Tom Frieden (in JAMA op/ed) denies evidence that e-cigs have helped smokers quit and falsely claims e-cigs will increase harms from tobacco, which is mathematically impossible even if all nonsmokers began vaping since at least a million smokers have already quit smoking with e-cigs, since e-cigs have already reduced cigarette consumption by two billion packs, and since e-cigs pose negligible risks.

<http://jama.jamanetwork.com/article.aspx?articleID=1812970>

<sup>3</sup>Newer products such as e-cigarettes could potentially help smokers quit, but will increase harms from tobacco if they increase the number of children who become addicted to nicotine, reduce the likelihood smokers will quit completely, entice former smokers back to smoking, or glamorize the act of smoking.<sup>2</sup>

JAMA op/ed by Legacy's David Abrams acknowledges huge health benefits e-cigs give smokers, but continues advocating FDA regulations that would ban all e-cig products

[http://jama.jamanetwork.com/article.aspx?articleID=1812971&utm\\_source=Silver](http://jama.jamanetwork.com/article.aspx?articleID=1812971&utm_source=Silver)

## Big Pharma and Other E-Cig Prohibitionists Expand Anti E-Cig Propaganda

JAMA article on e-cigs falsely claims nicotine contributes to smoking-related diseases, falsely claims survey and report evidence finding health benefits of e-cigs is "not very solid", falsely claims e-cigs are marketed to young people, are illegally advertised for therapeutic purposes, may be gateways to cigarettes, may promote smoking, and may emit toxic levels of toxins.

<http://jama.jamanetwork.com/article.aspx?articleid=1812964>

JAMA article misrepresents evidence on e-cigs, ignore evidence that e-cigs have helped many quit smoking and sharply reduce cigarette consumption, deceitfully exaggerates e-cig risks, repeats unsubstantiated fear mongering claims.

<http://jama.jamanetwork.com/article.aspx?articleid=1812953>

JAMA op/ed coauthored by Big Pharma funded researcher Michael Fiore fails to disclose his Big Pharma conflicts of interest, conflates all tobacco use with daily smoking, advocates FDA restrictions on e-cigs and cigars, far greater use of Big Pharma products, mandatory nicotine reductions in cigarettes, menthol cigarette ban, and even more youth access policies (none of which will reduce cigarette consumption or smoking rates)

<http://jama.jamanetwork.com/article.aspx?articleid=1812968>

Mike Siegel: Michael Fiore Hides Conflict of Interest With Big Pharma

<http://tobaccoanalysis.blogspot.com/2014/01/anti-smoking-researcher-hides-conflict.html>

Mike Siegel: Why Fiore's failure to disclose conflicts of interest is so important

<http://tobaccoanalysis.blogspot.com/2014/01/why-fiores-failure-to-disclose.html>

JAMA editorial by Schroeder and Koh hijacks 50th Anniversary of 1964 Surgeon General's Report by conflating all tobacco use with daily cigarette smoking, advocating even more FDA tobacco regulations, more funding for anti tobacco propaganda programs, and more ineffective and less than safe Big Pharma smoking cessation drugs.

EU

Clive Bates: Where is the humility? Where is the empathy?

<http://www.clivebates.com/?p=1221>

Konstantinos Farsalinos: The European Commission has misrepresented my scientific research on nicotine in e-cigarettes

<http://www.ecigarette-research.com/web/index.php/2013-04-07-09-50-07/85-what-s-new/whats-new-2014/147-misinterpreted-research>

Max Pemberton: Why e-smoking has got me fuming

<http://www.telegraph.co.uk/news/features/10551970/Why-e-smoking-has-got-me-fuming.html>

Now doctors say e-cigarettes do help you quit and could save millions of lives... so why are petty bureaucrats intent on banning them from public places?

<http://www.dailymail.co.uk/health/article-2537707/Now-doctors-say-e-cigarett-es-help-quit-smoking-ban-public-places.html#ixzz2ql5xsg50>

Clive Bates article from 2000 predicting the advent of e-cigs and other far less hazardous alternatives to cigarettes, and pondering if drug regulators and other THR opponents would continue protecting cigarette markets by opposing new smokefree alternatives  
<http://tobaccocontrol.bmj.com/content/9/2/237.full>

BMJ editorial praises Michael Bloomberg's outrageous e-cig ban (that protects cigarette markets and threatens the lives of vapers and smokers) and his non evidence based bans on transfats and sugary drinks, falsely claims e-cigs are being marketed to nonsmokers, and reveals that BMJ's primary opposition to e-cigs is its hatred of tobacco companies (which only recently began marketing e-cigs)  
<http://www.bmj.com/content/348/bmj.f7686>

Clive Bates responds to inaccurate and irrational BMJ editorial with the truth about cigarettes, smokeless tobacco, e-cigs, public health and intolerant prohibitionism  
<http://www.bmj.com/content/348/bmj.f7686/rr/681015>

Dr. Riccardo Polosa replies to BMJ editorial, points out that e-cigs have reduced cigarette smoking, and that cigarette smoking by US youth has declined to record lows as e-cig consumption has skyrocketed  
<http://www.bmj.com/content/348/bmj.f7686/rr/681202>

Jacques Le Houezec replies to BMJ that nicotine toxicity has been greatly exaggerated, and that cigarette smoking (not nicotine use) causes massive diseases and deaths.  
<http://www.bmj.com/content/348/bmj.f7686/rr/681162>

Dr. Paul Danaher replies to BMJ, points out there's no evidence e-cigs have preceded cigarette smoking, and criticizes EU and MHRA regulatory proposals to restrict e-cigs  
<http://www.bmj.com/content/348/bmj.f7686/rr/681191>

Jonathan Bagley replies to BMJ, explains that snus and e-cigs are both far less hazardous alternatives to cigarettes, and are NOT gateways to cigarette smoking  
<http://www.bmj.com/content/348/bmj.f7686/rr/680461>

## Asia

Taiwan tobacco prohibitionist group John Tung Foundation claims it received more complaints about e-cigs after it made false and misleading claims about the products  
<http://focustaiwan.tw/news/asoc/201401110022.aspx>

## Tobacco Taxation

Glantz misrepresents huge decline in cigarette consumption due to tax hikes, absurdly claims that more anti tobacco industry propaganda, R ratings for movies with smoking, and graphic cigarette pack warnings would reduce youth smoking by the same amount (56%) as a \$6.10/pack federal cigarette tax hike.  
<http://tobacco.ucsf.edu/tobacco-taxes-are-not-most-effective-tobacco-control-policy-actually-implemented>

## Smoking cessation

Quitting smoking unassisted: The 50-year research neglect of a major public health phenomenon (reveals results of Big Pharma's 20 year campaign to lobby health groups and agencies to abandon Cold Turkey in favor of ineffective NRT, less than safe Chantix, and subsidized cessation programs that promote those drugs for quitting)

<http://jama.jamanetwork.com/article.aspx?articleid=1812969>

Study conducted by Big Pharma funded researchers finds NRT products ineffective for quitting smoking, but FDA, CDC and Big Pharma funded CTFK, ACS, AHA, ALA, AAP, JAMA, ATTUD, etc. keep claiming otherwise

<http://onlinelibrary.wiley.com/doi/10.1111/add.12429/abstract>

Mike Siegel: New study finds that nicotine replacement therapy is ineffective for smoking cessation

<http://tobaccoanalysis.blogspot.com/2014/01/new-study-finds-that-nicotine.html>

Study finds combination of Varenicline and Bupropion no more effective than Varenicline alone for smoking cessation after one year, with reported increase in anxiety and depressive symptoms among participants using combined therapy

<http://jama.jamanetwork.com/article.aspx?articleid=1812959>

[http://www.eurekalert.org/pub\\_releases/2014-01/mc-ctb010714.php](http://www.eurekalert.org/pub_releases/2014-01/mc-ctb010714.php)

## Lung cancer

CDC reports significant decline in lung cancer in US from 2005 to 2010, but CDC still basis its annual US cigarette death toll estimate on outdated 1997-2001 data

[http://www.cdc.gov/mmwr/preview/mmwrhtml/mm6301a1.htm?s\\_cid=mm6301a1\\_w](http://www.cdc.gov/mmwr/preview/mmwrhtml/mm6301a1.htm?s_cid=mm6301a1_w)

<http://www.cdc.gov/media/releases/2014/p0109-lung-cancer.html>

<http://www.cdc.gov/mmwr/preview/mmwrhtml/mm5425a1.htm>

<http://www.cancer.org/acs/groups/content/@epidemiologysurveillance/documents/document/acspc-037132.pdf>

Lung cancer decreases as vaping increases

<http://guardianlv.com/2014/01/lung-cancer-decreases-as-vaping-increases/>

## Prohibition

CNN/ORC Poll of US adults finds 71% support, 27% oppose, keeping tobacco use legal

<http://i2.cdn.turner.com/cnn/2014/images/01/07/cnn.orc.poll.marijuana.1-7.pdf>
