Comments for Public Posting: I am a constituent of CD 12. These street vendors are all over Reseda Blvd. Northridge has worked very hard to improve Reseda Blvd., with new restaurants and other retail businesses. Now these street vendors are all over the place, selling food out of vans, popping up tents on public right of way. It is unsanitary and unsightly. Why would the City Council think this is a good idea. How is this fair to the brick and mortar businesses that are paying rent and taxes. Why aren't these businesses being monitored by the Health Department as other food businesses are. This idea was not thought through and now constituents and businesses are being hurt by this.
