

13-1515

**MOTION**

The Planning Department reviews, approves, and denies thousands of land use cases each year. As part of their review, projects are modified by imposing 'conditions of approval,' which oftentimes are agreed upon with community members, abutting neighbors, or local community business owners, and neighborhood councils.

The Planning Department recently implemented a new 'Code Compliance' section. It is very important for everyone who is a land use planning stakeholder in the city to understand the objectives, purpose, and goals of this newly created section within the Planning Department.

**I THEREFORE MOVE** that the Council instruct the Planning Department to prepare a report regarding its implementation of the department's new 'Code Compliance Section,' and specifically explain how fees are generated and used, and the goals and impacts of the new pilot compliance efforts.
