Message: I support the Citizens for Los Angeles Wildlife initiative to create an ordinance that will include: A city-wide ban on the sale and purchase of anticoagulant rodenticides. A prohibition of the municipal, commercial, industrial, professional and private use of anticoagulant rodenticides particularly in our hillsides and other ecologically-sensitive areas and/or within 100 feet of parks, school zones, playgrounds and play structures. A system of punitive fines to be instituted to support this ordinance, with additional fines for rodenticide usage in hillsides and ecologically sensitive areas.

(Sent via *Citizens for Los Angeles Wildlife*)

I have personally seen the ravages of this poison on our local coyotes . I watch one slowly deteriorate over the course of 6 week a year ago. Pasadena humane tried to capture it to treat t it but to no avail. It is a truly horrible and slow death. Domestic breeds get this too, and raptors and all other smaller mammals.
