Dear Honorable Members,

I realize that I may be sending this late but I wanted to express that I am very against allowing rodenticides to be used in this city and anywhere. The main rats that we have are native wood rats and I have even brought a poisoned one to California Wildlife Center for treatment. If someone wants/needs to kill a rat they should use an old fashioned snap trap or even better a "Hav-a-Heart" trap to remove the animal from their home. Rats should not be trapped and killed outside as they provide food for our wildlife. In our neighborhood a couple of years ago a young Red Tailed Hawk almost died after eating a poisoned rat but luckily CA Wildlife Center was able to save him after a neighbor brought him in.

Please help to ban this dangerous and cruel poison.

Thank you,

Cindy
