Item #30

### PUBLIC STATEMENT

On May 26, 2014, the elected members of the 39<sup>th</sup> & 46<sup>th</sup> Assembly Districts of the Republican Central Committee of Los Angeles County have chosen to support SB 1381, Labeling of Genetically Engineered Foods.

As a principle, our Republican philosophy is to rely on the free market rather than government intervention. However, in the case of GMO labeling, we believe that government is already intervening in support of large corporations and genetically engineered food, thus interrupting the free market forces.

Once clear labeling is required, we anticipate the food producers will fully understand the demand of non-GMO foods.
