Sharon,

Can you please add to the file noted above. Thank you.

We are back here again and exhausted. Since when having a permit did not mean anything? We are not asking, but demanding to grandfather us.

We also cannot accept the amendment 19B. First, it is discriminating against 2 people. You have held up the entire process to chase after 2 people that have also followed the law. In addition, "challenge by an administrative appeal process" language puts us as a group at risk again. This is very ambiguous and we cannot accept this. We get grandfathered only to find out that all of our permits have been challenged by an administrative appeal process. This will put us back right where we started from.

We also cannot accept this as tax payers. The City is opening itself to additional pay-out through law suits by not honoring its permits and COOs and discriminating against people.

I have a permit. If the permit is not honored, I will be forced to go to the next step in the process. No other choice, since we are pregnant already. You have backed us up against a wall.

This is the group that relied on the City's SDU policy. Instead of illegally converting a garage and exposing a family member or tenant to an unsafe living environment and the street to an overcrowded parking situation, we decided to build an SDU the right way. In addition, we paid City fees, will pay or are already paying increased property taxes and increased the value of the neighborhood.
