Item Number:

Brief Summary: The North Hollywood community including board members has expressed concern that in the best community interests for implementing local solar energy sources that LA city be given more control over location of such facilities. This would enable the city to "best fit" a solar project within existing neighborhoods. Also we are concerned that LADWP is not doing an adequate job of outreach to communities involved in solar projects.

BOARD MEETING AGENDA

| Item # | TIME | TOPIC | RESPONSIBLE PERSON |
|--------|-----------|--|--------------------|
| 11 | 5 minutes | <ul style="list-style-type: none"> Presentation, discussion and possible action is: The CIS Committee proposes the board back CF 14-0331 which states that the City instruct the Chief Legislative Analyst, in conjunction with the City Attorney, Department of Building and Safety and Department of City Planning, to review the Solar Rights Acts and recommend amendments that would give the City more discretion to review solar projects. <u>The reason is that cities like Los Angeles are limited in their ability to regulate solar developments in their communities and cannot prevent projects that are disruptive to neighborhoods.</u> The motion also states: That council requests the Department of Water and Power (DWP) to report on the status of the Lake View Terrace solar project located in the residential Equine keeping district, and other similar solar projects located in the residential areas; and the DWP efforts to adequately the community of these projects and potential local impacts. <p>This is also to support the Appeal to Planning Case #DIR-2013-2972-SPP and ENV- 2013 -2971 - CE</p> | David Govea |
