Honorable City Council Members,

Medical marijuana delivery can provide a safe and discreet alternative to visiting dispensaries. There are thousands of patients in the LA area who require medical marijuana delivery for access to their doctor recommended medication. These medications help reduce pain, seizures, side effects of chemotherapy, and provide other palliative care.

This is especially important for the many patients who can't visit a dispensary. LA's ban on medical marijuana delivery is deeply affecting the health and quality of life for these patients, and I would like to request that you consider reversing your decision.

Please allow Los Angeles residents to have legal delivery. We are the last of California's major cities to keep this essential service illegal. Legal delivery would make a big difference to patients like me.

Thank you for your consideration.
