Hello,

I want you to know that as a voting citizen of the City of LA I feel I needed to send this email. I voted YES on Measure M and Prop 64, and I was hoping that proper regulation would take place in my City. I feel that Type 7 Manufacturing should be allowed and not banned by the City of Los Angeles. Banning it will only benefit the black market operators. As a medical marijuana patient and employee of the cannabis industry I can tell you that some of our States best manufacturers are proudly based here in LA. Lets not criminalize them and lets help them to step out of the shadows and into a regulated environment. Brilliant products are being created every day here in LA while safely using these extraction methods. I have personally benefited from these products and so have many others like me.

Lynwood, Long Beach and other cities will be allowing Type 7 manufacturing why can't Los Angeles? These operations will be taking place in certified laboratories that will undergo audits and inspections from Dept. of Public Health and other regulating authorities.

Please reconsider this ban on Type 7 Manufacturing, I feel this would be a huge mistake for the City of LA.

Thank you for your time,

Diego Reguero
