Hello,

The purpose of this email is to reconsider the ban on Type 7 manufacturing in LA county. I voted Yes on Measure M and Prop 64 with hopes that proper regulation would take place in the City. As a medical marijuana patient, I strongly feel that banning it will only benefit the black market operators and deplete the city of much needed tax revenue. These operations would be taking place in certified laboratories that undergo inspections from the Department of Health. It is a big concern to me, because failure to remove the ban will lead home based extractions.

It is in the City's best interest to remove the ban and help the manufacturers transition into a regulated environment while safely using these extraction methods. It is my understanding that cities such as Long Beach and Lynwood will be allowing Type 7 manufacturing- it would be amazing to have our City benefit from this innovative industry as well.

Please reconsider this ban on Type 7 manufacturing.

Thank you for you time,

**Karla Chavez**
