Message: Dear Chairman Huizar and Honorable Members of the PLUM Committee, I am a Citizen for Los Angeles Wildlife and I support a Wildlife Habitat Linkage Zone ordinance. The Santa Monica Mountains is a special mountain range eco-system that runs through the heart of Los Angeles. LA City's eastern portion of urbanized canyons and hillsides between the I-405 and I-5 freeways is a critical Wildlife habitat Linkage Zone that should be established in our municipal code in order to protect the migratory patterns and habitats of our native animals. As part of the ordinance, please make sure every new building project undergoes a checklist and review for wildlife habitat connectivity and permeability. It needs to be passed now.

Honorable Jose Huizar
200 North Spring Street
Los Angeles, California 90012

Re: Council File 14-0518

Dear Councilman Huizar:

I am a resident of the Hermon Community in Northeast Los Angeles. It is my understanding that CF 14-0518 as proposed by Councilman Paul Koretz has been in your Planning and Land Use Management Committee since April of 2014 and will expire this April if it is not acted upon by this committee. This resolution supports the Santa Monica Mountains Wildlife Corridor Ordinance and I strongly feel that such an ordinance should be adopted for our city.

Keeping green space open is vital to maintaining the beauty of our city for generations to come. Keeping the wildlife safe that lives in these precious open spaces is also vital in maintaining our eco system for the future. We must have a development plan in place that will not infringe on these precious natural habitats and the wildlife that lives there. With good residential planning for the future, we can improve and develop our city yet maintain and protect these wildlife corridors and preserve them for generations to come.

I respectfully urge you to bring this matter to the attention of your PLUM committee and to act favorably on this council file. Please add this letter to Council File 14-0518. Thank you for your time and attention to this matter.

Sincerely,

Andrea Moran
5639 Monterey Road
Los Angeles, California 90042
(323) 255-2649

Los Angeles, CA 90012

March 28, 2016

RE: Council File 14-0518

Dear Councilmember Huizar,

As the expiration date approaches for Council File 14-0518, referred to the Planning and Land Use Management Committee in April 2014, we write to encourage you and your fellow PLUM Committee members to discuss and take action on this item which offers a feasible approach toward successful coexistence between the built and natural worlds in Los Angeles.

Your work to establish the Hillside Zones and related protective ordinances in Northeast Los Angeles was a powerful step in managing the impacts of development in our area's unique natural spaces.

We as a community continue to explore and refine our understanding of the intersection between the built and natural worlds and navigate toward healthy coexistence. The inhabitants of CD 14 rely on your unique understanding of the value in preserving and connecting natural spaces throughout the district, as well as the intricacies of fostering and managing growth and investment in these neighborhoods.

To establish a planning tool that acknowledges and provides for the wildlife and informal open spaces from the Eastern Santa Monica Mountains to the hillsides and informal open spaces of more densely populated areas in Northeast LA would be a forward-thinking approach on both fronts.

It is our hope that you will incorporate a discussion of Councilmember Koretz's motion in the Committee's agenda and bring your unique understanding to bear on a proposal that is an evolutionary next step in your work to find balance in our unique urban hillsides.

Thank you for your consideration and your ongoing work on behalf of the residents of Council District 14.

Sincerely,

Melissa Kellogg

Nate Tharp
