Subject: SUPPORT COUNCIL FILE 14-0518 - Wildlife Habitat Linkage Zones

Dear Councilmembers Huizar and members of the PLUM Committee,

We are Citizens for Los Angeles Wildlife and strongly support a Wildlife Habitat Linkage Zone ordinance.

Los Angeles is a unique city in that it has a wilderness mountain range running through its center stretching from Griffith Park to the Pacific Ocean. For thousands of years wildlife have been traveling in regular migratory patterns and ranges to hunt and breed within those Santa Monica Mountains but ever increasing population and building density in the hillsides are changing entire species and endangered their viability.

We've been blessed to live in the area of Los Angeles known as the Hollywood Dell for over twenty-two years now, and have always done our best to help preserve our wildlife, which is continuously threatened by the increased construction. As wildlife habitats are blocked those animals that survive (such as our Griffith Park mountain lion P22) are being forced down into the urban zones to find food and are increasingly encountering humans. The timing for this motion for a wildlife habitat linkage ordinance is critical. It needs to be passed now.

Thank you very much for taking our thoughts into consideration.

Regards,

Pamela M. and Bruce Bermudez
