

ITEM NO. (5)

14-0656

CATEGORICAL EXEMPTION, PLANNING AND LAND USE MANAGEMENT COMMITTEE REPORT and ORDINANCES FIRST CONSIDERATION relative to establishing a moratorium on the issuance of building and demolition permits within proposed Historic Preservation Overlay Zones and prohibiting the issuance of building permits for the construction of residentially zoned properties where construction does not meet neighborhood-specific criteria.

I, William Kuzmin, Realtor for 33 years and resident/property owner in the Old Granada Hills area for 28 years. I currently own a 2 bedroom home built in 1927 with 1296 sq ft and a 1 car garage situated on a 12,600 sq ft lot. If the proposed ICO passes, I would only be able to add 260 sq ft leaving me with a maximum sq footage of 1,456 sq ft and eliminating the possibility of adding a second garage leaving me with a maximum FAR of 11.5 % while the ICO is in effect. This exemplifies how unreasonably restrictive the ICO 120% rule is for myself and the OGH owners who do not know this is going to happen.

Upon performing an expert analysis of the Old Granada Hills (OGH) Neighborhood sales data (most previous 2.7 years) and based on my professional expertise as a Realtor, I hereby submit the following comments:

Whereas; The Categorical Exemptions and related California Environmental Quality Act findings, reports from the Department of City Planning and City Attorney and Interim Control Ordinances (ICO) are inaccurate and lack factual substantiation to conclude there is a current mansionsionization problem in Old Granada Hills.

Whereas; CD-12 did not provide the Department of City Planning any proof of a current or future trend of large 2 story boxlike structures that that is or may be likely to pose a threat to the public health, safety, or welfare when submitting the Old Granada Hills (OGH) Area.

Whereas; The inclusion of OGH was never an on an agenda posted by the Planning and Land Use committee which was a circumvention of public comment per the Brown Act.

Whereas; The OGH was included in the ICO motion scheduled on the consent calendar at the October 17, 2015 PLUM the item was identified as "continued" because the PLUM committee did not have a quorum when the proposed ICO was first heard at the October 7, 2015 PLUM committee meeting.

Whereas; There are no "legislative findings" or factual evidence to substantiate "a proliferation of large 2 story boxlike structures" being built to justify an "immediate current threat to the public health, safety and welfare" for the affected residential property owners of Old Granada Hills. If passed this is a violation of Governmental code 65858 (c).

Whereas; A previous ICO for the Old Granada Hills Area was in place for which all allowable extensions have expired. Per California governmental code 65858 (3)(1f) "a legislative body shall not adopt or extend any interim ordinance unless there is a set of circumstances different from the event, occurrence, or set of circumstances that led to the adoption of the prior interim ordinance".

I hereby request the removal of the Old Granada Hills area from the proposed ICO because there is no evidence that a "proliferation of large 2 story box like structures" are being built in the neighborhood based on factual data for the last 8 years. The facts indicate the opposite is true – there is no out of scale new construction in Old Granada Hills. All single family home "flips" have been modest one story additions or no additions at all (see MLS data). All have floor area ratio (FAR) less than 32% which is well below the current BMO limitations. Construction permits for homes that are owner occupied have not resulted in any out of scale homes.

It would be a violation of the City Charter and current municipal codes to circumvent the public notice and hearing requirement for including Old Granada Hills in the proposed ICO without factual justification there is an "urgent need" for control and also notifying them of the proposed RFA district. There are no "large 2 story boxlike structures" similarities between Old Granada Hills and the referenced affluent communities seeking relief from a mansionsionization problem like Beverly Grove.

- 1) When the homeowners are informed of the change by individual efforts, there is significant opposition to the RFA. Additionally, all 1,211 Old Granada Hills (OGH) residential property owners have never been formally noticed and informed of the proposed RFA district or the accompanying zoning changes by the Department of City Planning. This is a failure to comply with the noticing requirements for a "project". The inclusion of the Old Granada Hills RFA district in the proposed new community plan is illegal as it circumvents the "project" noticing requirements. Why hasn't the councilman done anything to correct the DCP failure to communicate the proposed changes to the affected property owners? Another individual and myself have collected 350 petition signatures (on file with the DCP) from GH property owners that oppose the OGH RFA in the proposed plan. In addition nearly half of the business owners on Chatworth St. have signed a petition opposing the RFA. To put these facts into perspective, only 311 people had signed up with the DCP to receive updates on the new GH community plan and 350 have stated their opposition to the RFA aspect in the proposed plan.
- 2) The evidence submitted in the attached Realtor's Multiple Listing sales data for the 1211 homes in the proposed OGH district that demonstrates that the homes being "flipped" ARE NOT large box like structures that are out of scale with the neighborhood. The ICO report from the Department of City Planning report states that the communities included in the ICO all have a "PROLIFERATION OF LARGE BOX LIKE STRUCTURES". For Old Granada Hills this is **FALSE**. On the contrary the largest floor area ratio for a flipped property was a blighted 1583 sq ft house on a 6749 sq ft lot that was expanded (one story) to 2,167 sq. ft. (17507 Andasol Ave.) resulting in a FAR of only 32.1 percent (subject property maximum BMO FAR is 50%). There is only one new home built on a previously vacant lot on Tribune St. in the last 5 years. It is a one story home with 2329 sq ft on a 9,500 sq ft lot with a FAR of 24.5%. Most of the flipped homes had no added sq. footage. This is factual proof there is not a problem or an indication of a future problem or trend towards out of scale development. (see attached MLS data). As a matter of record there is 1 home which is a remodel of 2 story 1,700 home on a 30,000 sq ft flag lot (not visible from street) which will be a multi-generational home occupied by the owner, which will be 5,000 sq. ft., a very low FAR of 17%.
- 3) The DCP report states that the problem of out of scale building is happening in affluent communities. Old Granada Hills area is a median income San Fernando Valley suburban neighborhood and bears no income demographics to justify calling it an affluent community. Note: most of the problems appear in council districts 4 and 5 where the median price of a home is over 1.5 million and the median price in old Granada hill area is about \$500,000. The DCP is comparing an apple to an orange. Granada Hills is not similar to these other affluent communities. There has only been one sale in the neighborhood close to 1 million and that was at the top of the market in 2007. OGH is not affluent as described in the reports.
- 4) The Old Granada Hills area has already used the maximum number of temporary ICO's for the proposed overlay RFA district from 2004 to 2007 and no evidence has been submitted to show that a change occurred that would make the new ICO necessary address to a "**different**" set of conditions than the original ICO for OGH. If passed with the OGH neighborhood the Ordinance would be in violation of governmental Code 65858.
- 5) As a realtor, the property owners must be notified as this is a critical real estate disclosure issue or law suits will most likely result just from the non-disclosure of the restrictions by Sellers to prospective buyers. To keep homeowners in the dark is to invite disaster. Ignorance is not bliss!

For comparison sake I have included the MLS data (post 2008) of the 48 large 2 story boxlike homes out of 750 flipped in the Current Beverly Grove RFA district as of November 2014 which illuminates what a true problem looks like when based on facts and accurate legislative findings.
