

ENVIRONMENTALLY PREFERABLE PRODUCTS VENDOR ENGAGEMENT PROGRAM

#4

The City of Los Angeles is committed to purchasing products that have a lesser or reduced effect on human health and the environment when compared with competing products that serve the same purpose.

In keeping with that commitment **LADWP** **Department of Public Works** **General Services Department** **LAWA** and the **Port of L.A.** are jointly sponsoring a new **Environmentally Preferable Products (EPP) Vendor Engagement Program**

The purpose of the program is to provide opportunities for vendors to demonstrate products which are environmentally preferable or present equipment for renewable projects in support of the above-listed City of Los Angeles agencies. Vendors who sell or manufacture products to support fleet, janitorial or equipment for renewables projects and meet specific business requirements will be selected to

sign up for an appointment to demonstrate and discuss their products to a panel composed of technical staff from the above listed organizations. These sessions will be held once a quarter at the offices of one of the agencies listed above. Vendors will be required to complete an application and meet specific product criteria. Vendors who meet the criteria will be invited to participate at the sole discretion of the EPP Vendor Engagement Team.

The first quarterly session will be held on Thursday, February 26, 2015 at the offices of the Los Angeles Department of Water and Power at 111 N. Hope Street, Los Angeles, CA 90012.

If you are interested in this new opportunity, please send an email of interest to purchbids@ladwp.com. An application and additional information about the opportunity will be forwarded to your attention within two business days of receipt of the indication of interest.
