Council File No: 14-1276-S2

Comments for Public Posting: I Strongly urge the Los Angeles City Council, to deny the permits requested by APMT at this time and until such time a Complete Environmental Impact Report can be done on 5G radio waves and what it does to people, the environment, animals, neighboring terminal ports, Businesses and cities as to we work in. And also what losing many ILWU Longshore/Clerks/Bossing/Mechanics/Security jobs will do to the Local City Economies and Businesses, Housing, Homelessness, and Many Other Aspects Throughout The City, State. I would rather See this Company "GoGreen" with New Battery Powered, "Manned"-Powered Vehicles. It has been proven at both of the automated terminal currently operating at The Port of Los Angeles and Port Of Long Beach, productivity has negatively Dropped over half as much as it is at conventional Terminals as to the point the companies have both been sold and or are failing as a direct result of Automation. I was raised in this area since I was 3. I Have Worked At the Ports for more than 20yrs, and am A Veteran from the USNavy at the Port of Long Beach as well. I have a family and love my job and the people I work with. Let the Council Vote as our Motto States: "An Injury To One, Is An Injury To All"! "No" to Job Killing robots and people killing 5g WiFi/Internet.
