I am small business owner and I agree that the minimum wage increase, but I think the increase is too high in such a short time, if the cost of business goes up we have to increase prices, special in the food business, and all kind of services, also small and big manufacturing businesses will leave Los Angeles. India's I can go to the next state with cheaper labor, I think the minimum wage increase should be done slower and it should be done at the state level, or better at the federal.

Thanks Paro.
