Dear Council Member Marqueece Harris-Dawson,

I have been a registered voter in the City of Los Angeles for over 25 years. This is the first occasion I've felt compelled to write a letter. I want to voice my support for home-sharing. I oppose the proposed limit off 180 nights per year. No night-cap is necessary—LA is a 365-day a year international city. Any positive experiences travelers have in our city will be a positive takeaway for the city of LA.

As you know housing costs in our area have exponentiated in the last 25 years. Home-sharing is helping folks make ends meet while giving an economic boost to local businesses.

I hope that LA doesn't take Manhattan Beach and Santa Monica's lead. Limiting hosting to just half a calendar year would certainly curtail 50% growth potential the remainder of the year.

Please consider the economic impacts on hosts and small business people when crafting legislation. Let me know if you schedule any town halls or hearings on the matter of homesharing in LA. Looking forward to a positive short-term rental regulations.

Sincerely,

Recoe Walker
