

I am writing this email in the regards to the homeless encampment that is stationed under the bridge steps away from my home. It is a on going battle that I have taken over .Since the passing of my parents who lived at the residence prior. My dad was active in this fight for many,many months before me. Since I have lived here for almost 9 months I have seen the homeless take over the community. I have grown frustrated that they have brought trash,disturbance and just plain disregard for our community. Different people come and go in different vehicles everyday. Ive witnessed fights and drug use. There are Shopping carts full of trash everywhere. They seem to have their own community within at least a 5 mile radius. They have people to repair and bring new bikes for them. Its just frustrating to witness this everyday. I have logged many license plates and pictures. Something has to be done sooner then later. We dont feel safe. We fear that houses and cars will get broken into. Its only been getting worse. I hate that our community isn't getting the help it needs!

Thank you,

Lisa Chacon
