Dear Planning and Land Use Management Committee:

Regarding Case No. CPC-2011-1923-CU-SPR-PA1

It is obvious that New West should be able to expand enrollment to 825 students. Does the City Council believe it makes sense to allow developers to build all over West LA, while limiting children's access to a good education?

It is an excellent school in a neighborhood that needs good public schools.

Property developers are making fortunes demolishing older, one-story housing units and building multi-story apartment and condominium buildings all over this neighborhood.

How can you compare the traffic generated from 75-100 6<sup>th</sup> graders (nearly all of whom live close enough to walk to school) to the traffic generated by all of these new, and very expensive, housing units?

Also, surely some of these apartments and condominiums will be occupied by families with children.

Thank you for your attention,

Deena Beasley
