**Comments for Public Posting:** 15-0499-S1 – I support this motion to examine Los Angeles Urban Tree Canopy as a whole, and to implement a comprehensive and uniform approach to increasing biodiversity and the urban tree canopy rather on a project by project basis. I urge you to move quickly to review and institute these policies as our urban tree canopy is diminishing quickly and until such policies are put in place I request the City institute a moratorium on the removal of all trees unless the trees are dead or diseased as determined by an independent arborist. Thank you.
