Dear Honorable Council-members,

I would like to show my support for the proposed Mobility Plan 2035. I think the private automobile has been given a chance and shown that it is not the ideal way for Angelenos to move around and we need to work harder to make sure we have a multi-modal future.

I'm a parent of a 6 and a 2 year old and I am hoping that we can make his teenage and young adult years safer. Growing up, many of my friends and classmates were killed and maimed in car crashes. I don't want my sons growing up having to experience the same thing. I want them to be able to ride their bikes without fear to the train station. I once skimped on tires because I wasn't making enough money to properly maintain my car; I was lucky that it didn't cost me my life. I don't want them to waste money on trying (and usually failing) to maintain a used car.

We are moving in the right direction, but we can't let one or two council-members to hold back our entire region. Please approve the Mobility Plan 2035. More protected bike lanes and more mass transit are the way toward a future of mobility and less heartbreak.

Sincerely,

Jesse Fuller
