To: John White <john.white@lacity.org>, The Honorable Joe Buscaino <councilmember.buscaino@lacity.org>

Since piggyback contracts are being used outside the legal definition, to include services and supplies, where is the language for compliance and contract oversight in these ordinances.

So far purchasing agents such as the National Joint Powers Alliance and US Communities have arbitration and other terms not compatible with the existing codes.

Because contracts are bid out of state, there are no allowances for these ordinances.

Please clarify and correct.
