RE: Tentative Tract No. 64918-CN
Related Case: n/a
10852, 10858 W. Peach Grove Street
C.D.: 4
Existing Zone(s): RD1.5-1
D.M.: 168B173
Community Plan: North Hollywood – Valley Village
CEQA: ENV-2005-8924-MND
Legal Description: Lots 53 Lot 54 Arb1 of Tract 6088

EXTENSION OF TIME

On March 6, 2006, the Deputy Advisory Agency conditionally approved this tentative tract map. In accordance with the provisions of Section 66452.6(e), Article 2, Chapter 3 of the Government Code, and Section 17.07 or 17.56-A of the Los Angeles Municipal Code, the Deputy Advisory Agency hereby grants a 6-year extension, totaling 9 years, from the decision date for the recording of the final map for Tentative Tract No. 64918-CN located at 10852 and 10858 W. Peach Grove Street in the North Hollywood – Valley Village Community Plan Area.

All tentative tract maps are automatically granted an additional one year as long as those maps were still valid as of July 15, 2008 and will expire before January 1, 2011.

Therefore, the new expiration date for the subject tract map is March 6, 2016 and no further extension of time to record a final map can be granted.

NOTE: IF THERE IS A RELATED CASE WITH YOUR TRACT / PARCEL, THIS EXTENSION WILL NOT EXTEND THE RELATED CASE APPROVAL.

S. Gail Goldberg
Advisory Agency

MICHAEL S.Y. YOUNG
Deputy Advisory Agency

Re: Tentative Tract No. 64918  
10858 (10852 & 10858) W. Peach Grove Street  
Council District: 4  
Existing Zone: RD1.5-1  
Community Plan: North Hollywood-Valley Village  
ENV No.: ENV-2005-8924-MND  
Fish and Game: Exempt

In accordance with provisions of Section 17.03 of the Los Angeles Municipal Code, the Advisory Agency approved Tentative Tract No. 64918 composed of one lot, located at 10858 (10852 & 10858) W. Peach Grove Street for a maximum 10 condominium units as shown on map stamp-dated December 8, 2005 in the North Hollywood-Valley Village Community Plan. This unit density is based on the RD1.5-1 Zone. (The subdivider is hereby advised that the Municipal Code may not permit this maximum approved density. Therefore, verification should be obtained from the Department of Building and Safety which will legally interpret the Zoning code as it applies to this particular property.) For an appointment with the Advisory Agency or a City Planner call (213) 978-1414. The Advisory Agency's approval is subject to the following conditions:

NOTE on clearing conditions: When two or more agencies must clear a condition, subdivider should follow the sequence indicated in the condition. For the benefit of the applicant, subdivider shall maintain record of all conditions cleared, including all material supporting clearances and be prepared to present copies of the clearances to each reviewing agency as may be required by its staff at the time of its review.
BUREAU OF ENGINEERING - SPECIFIC CONDITIONS

1. That a five-foot wide strip of land be dedicated along Peach Grove Street adjoining the subdivision to complete a 30-foot wide half street dedication including a 15-foot radius property line return at the intersection with Cleon Avenue all satisfactory to the City Engineer.

2. That a five-foot wide strip of land be dedicated along Cleon Avenue adjoining the subdivision to complete a 30-foot wide half street dedication all satisfactory to the City Engineer.

DEPARTMENT OF BUILDING AND SAFETY, GRADING DIVISION

3. Comply with any requirements with the Department of Building and Safety, Grading Division for recordation of the final map and issuance of any permit.

DEPARTMENT OF BUILDING AND SAFETY, ZONING DIVISION

4. That prior to recordation of the final map, the Department of Building and Safety, Zoning Division shall certify that no Building or Zoning Code violations exist on the subject site. In addition, the following items shall be satisfied:

   a. Obtain permits for the demolition or removal of all existing structures on the site. Provide copies of the demolition permits and signed inspection cards to show completion of the demolition work.

   b. Provide a copy of affidavit AFF-67599. Show compliance with all the conditions/requirements of the above affidavit(s) as applicable. Termination of above affidavit(s) may be required after map has been recorded. Obtain approval from the Department, on the termination form, prior to recording.

   c. Show all street dedication(s) as required by Bureau of Engineering. "Area" requirements shall be re-checked as per net lot area after street dedication.

   d. As shown on the map, for the net lot area of 14,108 sf divided by 1500sf allows only 9 condominium units in RD1.5 Zone. Revise the map or obtain variance from the Department of City Planning for the proposed 10 units.

Any proposed structures on the site have not been checked for Building or Zoning Code requirements. Plan check may be required before any construction, occupancy or change of use.

An appointment is required for the issuance of a clearance letter from the Department of Building and Safety. The applicant is asked to contact Del Reyes at (213) 482-6882 to schedule an appointment.
DEPARTMENT OF TRANSPORTATION

5. That prior to recordation of the final map, satisfactory arrangements shall be made with the Department of Transportation to assure:

a. A minimum of 20-foot reservoir space be provided between any security gate(s) and the property line.

b. A parking area and driveway plan be submitted to the Citywide Planning Coordination Section of Department of Transportation for approval prior to submittal of building permit plans for plan check by the Department of Building and Safety. Transportation approvals are conducted at 201 N. Figueroa Street Suite 400, Station 3.

FIRE DEPARTMENT

6. That prior to the recordation of the final map, a suitable arrangement shall be made satisfactory to the Fire Department, binding the subdivider and all successors to the following: (MM)

a. Submit plot plans for Fire Department approval and review prior to recordation of Tract Map Action.

b. Access for Fire Department apparatus and personnel to and into all structures shall be required.

BUREAU OF STREET LIGHTING

7. Street light improvements shall be made to the satisfaction of the Bureau of Street Lighting and/or the following street lighting improvements shall be required. (This condition shall be deemed cleared at the time the City Engineer clears Condition S-3. (c).)

INFORMATION TECHNOLOGY AGENCY

8. That satisfactory arrangements be made in accordance with the requirements of the Information Technology Agency to assure that cable television facilities will be installed in the same manner as other required improvements. Refer to the Los Angeles Municipal Code Section 17.05N. Written evidence of such arrangements must be submitted to the Information Technology Agency, 200 N. Main Street, 12th Floor, Los Angeles, CA 90012, (213) 922-8379.

DEPARTMENT OF RECREATION AND PARKS

9. That the Quimby fee be based on the RD1.5 Zone. (MM)
DEPARTMENT OF CITY PLANNING-SITE SPECIFIC CONDITIONS

10. Prior to the recordation of the final map, the subdivider shall prepare and execute a Covenant and Agreement (Planning Department General Form CP-6770) in a manner satisfactory to the Planning Department, binding the subdivider and all successors to the following:

a. Limit the proposed development to a maximum of ten dwelling units.

b. Provide a minimum of 2 covered off-street parking spaces per dwelling unit, plus 1/4 guest parking spaces per dwelling. All guest spaces shall be readily accessible, conveniently located, specifically reserved for guest parking, posted and maintained satisfactory to the Department of Building and Safety.

If guest parking spaces are gated, a voice response system shall be installed at the gate. Directions to guest parking spaces shall be clearly posted. Tandem parking spaces shall not be used for guest parking.

In addition, prior to issuance of a building permit, a parking plan showing off-street parking spaces, as required by the Advisory Agency, be submitted for review and approval by the Department of City Planning (200 No. Spring Street, Room 750).

c. That prior to issuance of a certificate of occupancy, a minimum 6-foot-high slumpstone or decorative masonry wall shall be constructed adjacent to neighboring residences, if no such wall already exists, except in required front yard.

d. The applicant shall install an air filtration system(s) to reduce the effects of diminished air quality on occupants of the project. (MM)

e. That a solar access report shall be submitted to the satisfaction of the Advisory Agency prior to obtaining a grading permit.

f. That the subdivider consider the use of natural gas and/or solar energy and consult with the Department of Water and Power and Southern California Gas Company regarding feasible energy conservation measures.

g. Recycling bins shall be provided at appropriate locations to promote recycling of paper, metal, glass, and other recyclable material. (MM)

Note to City Zoning Engineer and Plan Check. The Advisory Agency has approved the following variations from the Los Angeles Municipal Code as it applies to this subdivision and the proposed development on the site.
Approved Variations as follows:

a. The 10th unit is to be based on 892 square feet of lot area in lieu of the required 1,500 square feet in the RD1.5-1 zone.

b. The Deputy Advisory Agency designates Peach Grove Street as the frontage and Cleon Avenue as the side.

DEPARTMENT OF CITY PLANNING-ENVIRONMENTAL MITIGATION MEASURES

11. That prior to recordation of the final map the subdivider shall prepare and execute a Covenant and Agreement (Planning Department General Form CP-6770 and Exhibit CP-6770. M) in a manner satisfactory to the Planning Department requiring the subdivider to identify (a) mitigation monitor(s) who shall provide periodic status reports on the implementation of mitigation items required by Mitigation Condition No(s). 5, 6, 9, 10d, 10g, 12 and 13 of the Tract's approval satisfactory to the Advisory Agency. The mitigation monitor(s) shall be identified as to their areas of responsibility, and phase of intervention (pre-construction, construction, postconstruction/maintenance) to ensure continued implementation of the above mentioned mitigation items.

12. Prior to the recordation of the final map, the subdivider will prepare and execute a Covenant and Agreement (Planning Department General Form CP-6770) in a manner satisfactory to the Planning Department, binding the subdivider and all successors to the following:

MM-1 All open areas not used for buildings, driveways, parking areas, recreational facilities or walks shall be attractively landscaped and maintained in accordance with a landscape plan, including an automatic irrigation plan, prepared by a licensed landscape architect to the satisfaction of the Planning Department.

MM-2 Outdoor lighting shall be designed and installed with shielding, so that the light source cannot be seen from adjacent residential properties.

MM-3 The design and construction of the project shall conform to the Uniform Building Code seismic standards as approved by the Department of Building and Safety.

MM-4 The project shall comply with the Uniform Building Code Chapter 18. Division 1 Section 1804.5 Liquefaction Potential and Soil Strength Loss which requires the preparation of a geotechnical reports. The geotechnical report shall assess potential consequences of any liquefaction and soil strength loss, estimation of settlement, lateral movement or reduction in foundation soil-baring capacity, and discuss mitigation measures that may include building design consideration.
Building design considerations shall include, but are not limited to: ground stabilization, selection of appropriate foundation type and depths, selection of appropriate structural systems to accommodate anticipated displacements or any combination of these measures.

Prior to the issuance of the demolition permit, the applicant shall provide a letter to the Department of Building and Safety from a qualified asbestos abatement consultant that no ACM are present in the building. If ACM are found to be present, it will need to be abated in compliance with the South Coast Air Quality Management District's Rule 1403 as well as all other state and federal rules and regulations.

Project applicants are required to implement stormwater BMPs to retain or treat the runoff from a storm event producing 3/4 inch of rainfall in a 24 hour period. The design of structural BMPs shall be in accordance with the Development Best Management Practices Handbook Part B Planning Activities. A signed certificate from a California licensed civil engineer or licensed architect that the proposed BMPs meet this numerical threshold standard is required.

Post development peak stormwater runoff discharge rates shall not exceed the estimated pre-development rate for developments where the increase peak stormwater discharge rate will result in increased potential for downstream erosion.

Any connection to the sanitary sewer must have authorization from the Bureau of Sanitation.

Reduce impervious surface area by using permeable pavement materials where appropriate, including: pervious concrete/asphalt; unit pavers, i.e. turf block; and granular materials, i.e. crushed aggregates, cobbles.

Install Roof runoff systems where site is suitable for installation. Runoff from rooftops is relatively clean, can provide groundwater recharge and reduce excess runoff into storm drains.

Paint messages that prohibits the dumping of improper materials into the storm drain system adjacent to storm drain inlets. Prefabricated stencils can be obtained from the Dept. of Public Works, Stormwater Management Division.

All storm drain inlets and catch basins within the project area must be stenciled with prohibitive language (such as "NO DUMPING - DRAINS TO OCEAN") and/or graphical icons to discourage illegal dumping.

Signs and prohibitive language and/or graphical icons, which prohibit illegal dumping, must be posted at public access points along channels and
creeks within the project area.

MM-15  Legibility of stencils and signs must be maintained.

MM-16  Design an efficient irrigation system to minimize runoff including: drip irrigation for shrubs to limit excessive spray; shutoff devices to prevent irrigation after significant precipitation; and flow reducers.

MM-17  The owner(s) of the property will prepare and execute a covenant and agreement (Planning Department General form CP-6770) satisfactory to the Planning Department binding the owners to post construction maintenance on the structural BMPs in accordance with the Standard Urban Stormwater Mitigation Plan and or per manufacturer's instructions.

MM-18  Concrete, not metal, shall be used for construction of parking ramps.

MM-19  The interior ramps shall be textured to prevent tire squeal at turning areas.

MM-20  The applicant shall pay school fees to the Los Angeles Unified School District to offset the impact of additional student enrollment at schools serving the project area.

MM-21  The project will comply with the Bureau of Engineering's requirements for street dedications and improvements that will reduce traffic impacts in direct proportion to those caused by the project's implementation.

13.  Construction Mitigation Conditions - Prior to the issuance of a grading or building permit, or the recordation of the final map, the subdivider shall prepare and execute a Covenant and Agreement (Planning Department General Form CP-6770) in a manner satisfactory to the Planning Department, binding the subdivider and all successors to the following:

CM-1  That a sign be required on site clearly stating a contact/complaint telephone number that provides contact to a live voice, not a recording or voice mail, during all hours of construction, the construction site address, and the tract map number. YOU ARE REQUIRED TO POST THE SIGN 7 DAYS BEFORE CONSTRUCTION IS TO BEGIN.

- Locate the sign in a conspicuous place on the subject site or structure (if developed) so that it can be easily read by the public. The sign must be sturdily attached to a wooden post if it will be free-standing.

- Regardless of who posts the site, it is always the responsibility of the applicant to assure that the notice is firmly attached, legible, and remains in that condition throughout the entire construction period.

- If the case involves more than one street frontage, post a sign on
each street frontage involved. If a site exceeds five (5) acres in size, a separate notice of posting will be required for each five (5) acres, or portion thereof. Each sign must be posted in a prominent location.

CM-2 All unpaved demolition and construction areas shall be wetted at least twice daily during excavation and construction, and temporary dust covers shall be used to reduce dust emissions and meet SCAQMD District Rule 403. Wetting could reduce fugitive dust by as much as 50 percent.

CM-3 The owner or contractor shall keep the construction area sufficiently dampened to control dust caused by construction and hauling, and at all times provide reasonable control of dust caused by wind.

CM-4 All loads shall be secured by trimming, watering or other appropriate means to prevent spillage and dust.

CM-5 All materials transported off-site shall be either sufficiently watered or securely covered to prevent excessive amount of dust.

CM-6 All clearing, earth moving, or excavation activities shall be discontinued during periods of high winds (i.e., greater than 15 mph), so as to prevent excessive amounts of dust.

CM-7 General contractors shall maintain and operate construction equipment so as to minimize exhaust emissions.

CM-8 The project shall comply with the City of Los Angeles Noise Ordinance No. 144,331 and 161,574, and any subsequent ordinances, which prohibit the emission or creation of noise beyond certain levels at adjacent uses unless technically infeasible.

CM-9 Construction and demolition shall be restricted to the hours of 7:00 am to 6:00 pm Monday through Friday, and 8:00 am to 6:00 pm on Saturday.

CM-10 Construction and demolition activities shall be scheduled so as to avoid operating several pieces of equipment simultaneously, which causes high noise levels.

CM-11 The project contractor shall use power construction equipment with state-of-the-art noise shielding and muffling devices.

CM-12 The project sponsor must comply with the Noise Insulation Standards of Title 24 of the California Code Regulations, which insure an acceptable interior noise environment.

CM-13 All waste shall be disposed of properly. Use appropriately labeled recycling bins to recycle construction materials including: solvents, water-based
paints, vehicle fluids, broken asphalt and concrete, wood, and vegetation. Non recyclable materials/wastes must be taken to an appropriate landfill. Toxic wastes must be discarded at a licensed regulated disposal site.

CM-14 Clean up leaks, drips and spills immediately to prevent contaminated soil on paved surfaces that can be washed away into the storm drains.

CM-15 Do not hose down pavement at material spills. Use dry cleanup methods whenever possible.

CM-16 Cover and maintain dumpsters. Place uncovered dumpsters under a roof or cover with tarps or plastic sheeting.

CM-17 Use gravel approaches where truck traffic is frequent to reduce soil compaction and limit the tracking of sediment into streets.

CM-18 Conduct all vehicle/equipment maintenance, repair, and washing away from storm drains. All major repairs are to be conducted off-site. Use drip pans or drop clothes to catch drips and spills.

DEPARTMENT OF CITY PLANNING-STANDARD CONDOMINIUM CONDITIONS

C-1. That approval of this tract constitutes approval of model home uses, including a sales office and off-street parking. Where the existing zoning is (T) or (Q) for multiple residential use, no construction or use shall be permitted until the final map has recorded or the proper zone has been effectuated. If models are constructed under this tract approval, the following conditions shall apply:

1. Prior to recordation of the final map, the subdivider shall submit a plot plan for approval by the Division of Land Section of the Department of City Planning showing the location of the model dwellings, sales office and off-street parking. The sales office must be within one of the model buildings.

2. All other conditions applying to Model Dwellings under Section 12.22A, 10 and 11 and Section 17.05 O of the Code shall be fully complied with satisfactory to the Department of Building and Safety.

C-2. That prior to recordation of the final map, the subdivider shall record an “Agreement for Development of Units for Lease or Sale (“15% Ordinance”)” covenant, to benefit the Housing Authority, for certification of the development in accordance with Section 12.39A. Arrangements shall be made with the Department of Building and Safety, Zoning Section - Subdivisions (213.482.0000) to approve the covenant format, prior to recording the covenant.

C-3. Prior to the recordation of the final map, the subdivider shall pay or guarantee the payment of a park and recreation fee based on the latest fee rate schedule applicable. The amount of said fee to be established by the Advisory Agency in
accordance with Section 17.12 of the Los Angeles Municipal Code and to be paid and deposited in the trust accounts of the Park and Recreation Fund.

C-4. That a landscape plan, prepared by a licensed landscape architect, be submitted to and approved by the Advisory Agency in accordance with CP-6730 prior to obtaining any grading or building permits before the recordation of the final map.

In the event the subdivider decides not to request a permit before the recordation of the final map, a covenant and agreement satisfactory to the Advisory Agency guaranteeing the submission of such plan before obtaining any permit shall be recorded.

C-5. In order to expedite the development, the applicant may apply for a building permit for an apartment building. However, prior to issuance of a building permit for apartments, the registered civil engineer, architect or licensed land surveyor shall certify in a letter to the Advisory Agency that all applicable tract conditions affecting the physical design of the building and/or site, have been included into the building plans. Such letter is sufficient to clear this condition. In addition, all of the applicable tract conditions shall be stated in full on the building plans and a copy of the plans shall be reviewed and approved by the Advisory Agency prior to submittal to the Department of Building and Safety for a building permit.

OR

If a building permit for apartments will not be requested, the project civil engineer, architect or licensed land surveyor must certify in a letter to the Advisory Agency that the applicant will not request a permit for apartments and intends to acquire a building permit for a condominium building(s). Such letter is sufficient to clear this condition.

BUREAU OF ENGINEERING - STANDARD CONDITIONS

S-1. (a) That the sewerage facilities charge be deposited prior to recordation of the final map over all of the tract in conformance with Section 64.11.2 of the Municipal Code.

(b) That survey boundary monuments be established in the field in a manner satisfactory to the City Engineer and located within the California Coordinate System prior to recordation of the final map. Any alternative measure approved by the City Engineer would require prior submission of complete field notes in support of the boundary survey.

(c) That satisfactory arrangements be made with both the Water System and the Power System of the Department of Water and Power with respect to water mains, fire hydrants, service connections and public utility easements.
(d) That any necessary sewer, street, drainage and street lighting easements be dedicated. In the event it is necessary to obtain off-site easements by separate instruments, records of the Bureau of Right-of-Way and Land shall verify that such easements have been obtained. The above requirements do not apply to easements of off-site sewers to be provided by the City.

(e) That drainage matters be taken care of satisfactory to the City Engineer.

(f) That satisfactory street, sewer and drainage plans and profiles as required, together with a lot grading plan of the tract and any necessary topography of adjoining areas be submitted to the City Engineer.

(g) That any required slope easements be dedicated by the final map.

(h) That each lot in the tract comply with the width and area requirements of the Zoning Ordinance.

(i) That 1-foot future streets and/or alleys be shown along the outside of incomplete public dedications and across the termini of all dedications abutting unsubdivided property. The 1-foot dedications on the map shall include a restriction against their use of access purposes until such time as they are accepted for public use.

(j) That any 1-foot future street and/or alley adjoining the tract be dedicated for public use by the tract, or that a suitable resolution of acceptance be transmitted to the City Council with the final map.

(k) That no public street grade exceed 15%.

(l) That any necessary additional street dedications be provided to comply with the Americans with Disabilities Act (ADA) of 1990.

S-2. That the following provisions be accomplished in conformity with the improvements constructed herein:

(a) Survey monuments shall be placed and permanently referenced to the satisfaction of the City Engineer. A set of approved field notes shall be furnished, or such work shall be suitably guaranteed, except where the setting of boundary monuments requires that other procedures be followed.

(b) Make satisfactory arrangements with the Department of Traffic with respect to street name, warning, regulatory and guide signs.

(c) All grading done on private property outside the tract boundaries in connection with public improvements shall be performed within dedicated slope easements or by grants of satisfactory rights of entry by the affected
property owners.

(d) All improvements within public streets, private street, alleys and easements shall be constructed under permit in conformity with plans and specifications approved by the Bureau of Engineering.

(e) Any required bonded sewer fees shall be paid prior to recordation of the final map.

S-3. That the following improvements be either constructed prior to recordation of the final map or that the construction be suitably guaranteed:

(a) Construct on-site sewers to serve the tract as determined by the City Engineer.

(b) Construct any necessary drainage facilities.

(c) Install street lighting facilities to serve the tract as required by the Bureau of Street Lighting.

(d) Plant street trees and remove any existing trees within dedicated streets or proposed dedicated streets as required by the Street Tree Division of the Bureau of Street Maintenance. All street tree planting’s shall be brought up to current standards. When the City has previously been paid for tree planting, the subdivider or contractor shall notify the Street Tree Division ((213) 485-5675) upon completion of construction to expedite tree planting.

(e) Repair or replace any off-grade or broken curb, gutter and sidewalk satisfactory to the City Engineer.

(f) Construct access ramps for the handicapped as required by the City Engineer.

(g) Close any unused driveways satisfactory to the City Engineer.

(h) Construct any necessary additional street improvements to comply with the Americans with Disabilities Act (ADA) of 1990.

(i) That the following improvements be either constructed prior to recordation of the final map or that the construction be suitably guaranteed:

1. Submittal of hydrology and hydraulic calculations and drainage plans for review by the City Engineer prior to recordation of the final map may be required.

2. Improve Peach Grove Street being dedicated and adjoining the subdivision by the construction of the following:
A. A concrete curb, a concrete gutter, and a five-foot concrete sidewalk adjacent to the property line and landscaping of the parkway.

B. Suitable surfacing to join the existing pavements and to complete a 20-foot half roadway.

C. Any necessary removal and reconstruction of existing improvements.

D. The necessary transitions to join the existing improvements all satisfactory to the City Engineer.

3. Improve Cleon Avenue being dedicated by the construction of the following:

A. A concrete curb, a concrete gutter, and a five-foot concrete sidewalk adjacent to the property line and landscaping of the parkway.

B. Suitable surfacing to join the existing pavement and to provide a 20-foot roadway.

C. Any necessary removal and reconstruction of existing improvements.

D. The necessary transitions to join the existing improvement.

NOTES:

The Advisory Agency approval is the maximum number of units permitted under the tract action. However the existing or proposed zoning may not permit this number of units.

Any removal of the existing street trees shall require Board of Public Works approval.

Satisfactory arrangements shall be made with the Los Angeles Department of Water and Power, Power System, to pay for removal, relocation, replacement or adjustment of power facilities due to this development. The subdivider must make arrangements for the underground installation of all new utility lines in conformance with Section 17.05N of the Los Angeles Municipal Code.

The final map must record within 36 months of this approval, unless a time extension is granted before the end of such period.

The Advisory Agency hereby finds that this tract conforms to the California Water Code, as required by the Subdivision Map Act.
No building permit will be issued until the subdivider has secured a certification from the Housing Authority that the development complies with the requirements for low-and moderate-income housing, per Section 12.39-A of the LAMC.

The subdivider should consult the Department of Water and Power to obtain energy saving design features which can be incorporated into the final building plans for the subject development. As part of the Total Energy Management Program of the Department of Water and Power, this no-cost consultation service will be provided to the subdivider upon his request.

FINDINGS OF FACT (CEQA)

The Department of City Planning issued Mitigated Negative Declaration ENV-2005-8924-MND on January 25, 2006. The Department found that potential negative impact could occur from the project's implementation due to:

- Aesthetics (visual character, light);
- Air Quality (construction, operational);
- Biological Resources (tree removal);
- Geology and Soils (construction, seismic, liquefaction);
- Hazards and Hazardous Materials (asbestos);
- Hydrology and Water Quality (stormwater);
- Noise (construction, operational);
- Public Services (fire, schools, street improvements);
- Recreation (parks);
- Transportation/Circulation (emergency access).

The Deputy Advisory Agency, certifies that Mitigated Negative Declaration No. ENV-2005-8924-MND reflects the independent judgement of the lead agency and determined that this project would not have a significant effect upon the environment provided the potential impacts identified above are mitigated to a less than significant level through implementation of Condition No(s). 5, 6, 9, 10d, 10g, 12 and 13 of the Tract's approval. Other identified potential impacts not mitigated by these conditions are mandatorily subject to existing City ordinances, (Sewer Ordinance, Grading Ordinance, Flood Plain Management Specific Plan, Xeriscape Ordinance, Stormwater Ordinance, etc.) which are specifically intended to mitigate such potential impacts on all projects.

The Initial Study prepared for the project identifies potential adverse impacts on fish or wildlife resources as far as earth, air, water, plant life, and risk of upset are concerned. However, measures are required as part of this approval which will mitigate the above mentioned impacts to a less than significant level. Furthermore, the project site, as well as the surrounding area is presently developed with structures and does not provide a natural habitat for either fish or wildlife. In light of the above, the project qualifies for the De Minimis Exemption for Fish and Game fees (AB 3158)

In accordance with Section 21081.6 of the Public Resources Code (AB3180), the Deputy Advisory Agency has assured that the above identified mitigation measures will be
implemented by requiring reporting and monitoring as specified in Condition No. 11.

FINDINGS OF FACT (SUBDIVISION MAP ACT)

In connection with the approval of Tentative Tract No. 64918, the Advisory Agency of the City of Los Angeles, pursuant to Sections 66473.1, 66474.60, .61 and .63 of the State of California Government Code (the Subdivision Map Act), makes the prescribed findings as follows:

(a) THE PROPOSED MAP WILL BE/IS CONSISTENT WITH APPLICABLE GENERAL AND SPECIFIC PLANS.

The adopted North Hollywood-Valley Village Community Plan designates the subject property for Low Medium II Residential land use with the corresponding zone(s) of RD2 and RD1.5. The property contains approximately 0.32 net acres (14,108 net square feet after required dedication) and is presently zoned RD1.5-1. The proposed development of ten units is allowable under the current adopted zone and the land use designation with the requested adjustment to permit the 10th unit to be based on 892 square feet of lot area in lieu of the required 1,500 net square feet.

The site is not subject to the Specific Plan for the Management of Flood Hazards (floodways, floodplains, mud prone areas, coastal high-hazard and flood-related erosion hazard areas).

Therefore, as conditioned, the proposed tract map is consistent with the intent and purpose of the applicable General and Specific Plans.

(b) THE DESIGN AND IMPROVEMENT OF THE PROPOSED SUBDIVISION ARE CONSISTENT WITH APPLICABLE GENERAL AND SPECIFIC PLANS.

Peach Grove Street is a Local Street dedicated to a 50-foot width at the project's street frontage. Cleon Avenue is a Local Street dedicated to a 50-foot width at the project's street frontage. The Bureau of Engineering is requiring five-foot dedications along Peach Grove Street and Cleon Avenue to complete 30-foot wide half street dedication in accordance with Local Street Standards. The applicant requested at the public hearing a waiver of the dedication along Peach Grove Street. The Deputy Advisory Agency determined that the dedications, and improvements required by the Bureau of Engineering along Peach Grove Street and Cleon Avenue are necessary because the streets are currently too narrow to permit two cars to pass. This widening will improve flow for both standard vehicular traffic and emergency vehicles.

The proposed project will provide 12 parking spaces in conformance with the Los Angeles Municipal Code and the Deputy Advisory Agency’s parking policy for condominium projects. As conditioned the design and improvements of the proposed project are consistent with the applicable General and Specific Plans.
(c) THE SITE IS PHYSICALLY SUITABLE FOR THE PROPOSED TYPE OF DEVELOPMENT.

The site is level and is not located in a slope stability study area, high erosion hazard area, or a fault-rupture study zone. It is located in a liquefaction zone. The tract has been approved contingent upon the satisfaction of the Department of Building and Safety, Grading Division prior to the recordation of the map and issuance of any permits.

(d) THE SITE IS PHYSICALLY SUITABLE FOR THE PROPOSED DENSITY OF DEVELOPMENT.

The project site is comprised of two rectangular level lots developed with two single family residences. The site is zoned RD1.5-1 and is located in the North Hollywood-Valley Village Community Plan and has a Low Medium II Residential land use designation. Adjacent use are single family to the north across Peach Grove Street in the RD1.5-1 zone, single family to the east and south in the RD1.5-1 zone, and a triplex to the west across Clean Avenue in the (Q)R3-1 zone. The site is physically suited for the proposed density of this condominium project with approval of the requested adjustment to permit the 10th unit to be to be based on 892 square feet of lot area in lieu of the required 1,500 feet.

(e) THE DESIGN OF THE SUBDIVISION AND THE PROPOSED IMPROVEMENTS ARE NOT LIKELY TO CAUSE SUBSTANTIAL ENVIRONMENTAL DAMAGE OR SUBSTANTIALLY AND AVOIDABLY INJURE FISH OR WILDLIFE OR THEIR HABITAT.

The Initial Study prepared for the project identifies potential adverse impact on fish or wildlife resources as far as earth, air, water, plant life, and risk of upset are concerned. However; measures are required as part of this approval which will mitigate the above mentioned impacts to a less than significant level. Furthermore, the project site, as well as the surrounding area is presently developed with structures and does not provide a natural habitat for either fish or wildlife.

In light of the above, the project qualifies for the De Minimis Exemption for Fish and Game fees (AB 3158).

(f) THE DESIGN OF THE SUBDIVISION AND THE PROPOSED IMPROVEMENTS ARE NOT LIKELY TO CAUSE SERIOUS PUBLIC HEALTH PROBLEMS.

There appear to be no potential public health problems caused by the design or improvement of the proposed subdivision.

The development is required to be connected to the City's sanitary sewer system, where the sewage will be directed to the LA Hyperion Treatment Plant, which is currently being upgraded to meet Statewide ocean discharge standards. The Bureau of Engineering has reported that the proposed subdivision does not violate
the existing California Water Code because the subdivision will be connected to the public sewer system and will have only a minor incremental impact on the quality of the effluent from the Hyperion Treatment Plant.

**THE DESIGN OF THE SUBDIVISION AND THE PROPOSED IMPROVEMENTS WILL NOT CONFLICT WITH EASEMENTS ACQUIRED BY THE PUBLIC AT LARGE FOR ACCESS THROUGH OR USE OF PROPERTY WITHIN THE PROPOSED SUBDIVISION.**

No such easements are known to exist. Needed public access for roads and utilities will be acquired by the City prior to recordation of the proposed tract.

**THE DESIGN OF THE PROPOSED SUBDIVISION WILL PROVIDE, TO THE EXTENT FEASIBLE, FOR FUTURE PASSIVE OR NATURAL HEATING OR COOLING OPPORTUNITIES IN THE SUBDIVISION. (REF. SECTION 66473.1)**

In assessing the feasibility of passive or natural heating or cooling opportunities in the proposed subdivision design, the applicant has prepared and submitted materials which consider the local climate, contours, configuration of the parcel(s) to be subdivided and other design and improvement requirements.

Providing for passive or natural heating or cooling opportunities will not result in reducing allowable densities or the percentage of a lot which may be occupied by a building or structure under applicable planning and zoning in effect at the time the tentative map was filed.

The lot layout of the subdivision has taken into consideration the maximizing of the north/south orientation. The topography of the site has been considered in the maximization of passive or natural heating and cooling opportunities.

In addition, prior to obtaining a building permit, the subdivider shall consider building construction techniques, such as overhanging eaves, location of windows, insulation, exhaust fans; planting of trees for shade purposes and the height of the buildings on the site in relation to adjacent development.

**ADJUSTMENT FINDINGS (Sections 12.28 C.4 and 17.03 A)**

**THE GRANTING OF THE ADJUSTMENT WILL RESULT IN DEVELOPMENT THAT IS COMPATIBLE AND CONSISTENT WITH THE SURROUNDING USES, AND WILL CREATE NO ADVERSE IMPACTS OR ANY ADVERSE IMPACTS HAVE BEEN MITIGATED.**

The RD1.5 zone permits one unit per 1,500 square feet of lot area. The lot is 14,108 net square feet, and only nine units can be constructed by-right. The applicant is requesting to permit the 10th unit to be based on 892 square feet of lot area in lieu of the required 1,500 feet. The proposed ten-unit building will be compatible and consistent with the surrounding multi-family residential uses. The
project will provide 22 parking spaces which should help reduce the on-street parking impact that can occur with apartment buildings which require fewer parking spaces.

The applicant requested at the hearing a slight modification for reduced front and side yards and a Zoning Administrator’s Adjustment to permit an over-height fence in the front yard. As these issues were not included in the original request, the environmental clearance, or the hearing notice, the Deputy Advisory Agency is denying those requests.

A Mitigated Negative Declaration ENV-2005-8924-MND was prepared for the subject project and identifies mitigation measures which will mitigate any impacts resulting from the project. These mitigation measures have been imposed as conditions of approval.

The site is located within the North Hollywood-Valley Village Community Plan Area. The plan designates the subject site for Low Medium II Residential land use with corresponding zones of RD2 and RD1.5 and Height District No. 1. The granting of an adjustment is consistent with the intent and purpose of the Community Plan. The North Hollywood-Valley Village Community Plan does not specifically address adjustments.

In this instance, the applicant would be allowed nine units under the strict interpretation of the zoning regulations; however, in all other ways, the proposed development conforms with the zoning requirements - e.g., provision of required parking, open space, and observance of required setbacks from respective property lines. The granting of the adjustment would permit the applicant to provide much needed housing in an area designated for multi-family buildings, which is consistent with the General Plan Housing Element and in conformance with use, yard and height requirements of the zone. The ten-unit condominium project is consistent with all elements of the General Plan, in particular; the Framework, Housing, and Land Use Elements which address how to meet the demands of the growing population in the City and the provision of housing for all levels of income. The granting of the adjustment to permit one additional condominium unit will not adversely affect any element of the General Plan and will provide needed housing.

THAT THE SITE AND/OR EXISTING IMPROVEMENTS MAKE STRICT ADHERENCE TO ZONING REGULATIONS IMPRACTICAL OR INFEASIBLE.

The unique features of this site consisting of a corner lot, as well as the location of existing improvements thereon, make the request as proposed, logical, as it would allow for the functional integration of the project with existing improvements in the area.
These findings shall apply to both the tentative and final maps for Tract No. 64918.
