**Comments for Public Posting:** Owning a parking business, I can always see the importance of parking. With the unfortunate crisis we face safe parking is a no brainer. I've conducted my own research to implement safe parking in my own manner. It's important to provide safe parking for various reasons. A car provides protection, transportation, storage, and much more to housed and unhoused neighbors. Those who live in their vehicles it's vital for them and their lives to be able to have a vehicle. Anything that hurts or makes it illegal to be homeless and have a car is just a push in the wrong direction. It's easier and lower cost to assist homeless with vehicles. The research should be extensive and with great variation. I'm implementing my own solution without external assistance or funds.

**Comments for Public Posting:** If you're going to criminalize people living in their vehicles, which is wrong to begin with, the least you can do is provide a place for them to park legally

**Comments for Public Posting:** Hello, My name is Raymond Cole. I am a member of the Woodland Hills Warner Center NC, Chair of the Homelessness Committee, a member of the West Valley Neighborhood Alliance on Homelessness and Hospital Liaison/Case Management Supervisor for a Homeless Services Organization in SPA 2. I represent myself in this public comment. I hope that you reconsider LAMC 85.02, or if it is not reconsidered, immediately put into affect safe parking locations throughout the City of Los Angeles. There over 16,000 individuals living in cars, RV's, and Vans. There is not enough parking in the zones where parking is allowed, and in these areas I don't see any supportive services, showers, or health services that are mobile. These are the additional services that come with Safe Parking, and ensures that individuals living in their vehicles can live with dignity and become more functional members of society. This is a small part of the housing situation that could be resolved with more safe parking locations in more council districts. There are plenty of government locations that can be identified in the council districts by utilizing the City Controller's website and dashboard. We can work together to make a difference. Thank you, Raymond Cole, MS.

**Comments for Public Posting:** THIS is more like it. Give these nice people a real chance to obtain housing. It will also create security jobs. So vote YES. Vote humanity.
